BZWBK Management Board recommendation regarding proposed dividend payment.

Following recently issued proposal to pay out dividend from 2011 profits of the bank in the amount of PLN 8.00 per share or ca. 50% of profits after tax of the bank, the Management Board would like to present following arguments, supporting this proposal.

The financial position of the Group is sound as evidenced by the following ratios:

Solvency ratio of the Group	15.10%
Solvency ratio of the Bank	14.60%
Tier I ratio of the Group	13.15%
Tier I ratio of then Bank	12.71%
FX personal loans constitute	22%

All the above ratios were calculated already under the assumption of the proposed dividend payment.

The Management Boards considers that:

- 1) level of retained profits is sufficient to conduct the strategy of the Bank/Group and provides adequate balance between efficient capital utilisation and growth.
- 2) accumulated capital base reflects prudent approach to acceptable risk level associated to current and future Bank business and ensuring safeness of placed deposits.
- 3) guidelines issued in march 2012 re dividend payment by Komisja Nadzoru Finansowego are fully satisfied.

The Audit and Compliance Committee operates under a written Terms of Reference approved by the Supervisory Board and undertakes its duties in line with an agreed annual work programme that allows the Committee to monitor (and seek assurance on) the management of the financial risks identified in the Bank's business plan.

The Committee reviewed key areas of material controls, including financial, operational, regulatory compliance and risk management systems. On a regular basis it receives reports on risk management, fraud, anti money laundering, legal, regulatory and corporate governance matters in order to assess the effectiveness of the risk management and control frameworks. In 2011, these reports included some notifications arising under the Group policy on "whistle blowing", updates on significant projects in the Bank, detailed analysis of capital ratios, adequacy of provisioning including IBNR provisions, the implementation of EU Directives, Sarbanes Oxley compliance, Basel II compliance and IT system implementations.

In view of the shareholder change, whereby BZ WBK became part of Santander Group, the Supervisory Board entrusted the Audit and Compliance Committee with the task of appointing Deloitte Audyt, the auditor of Santander Group as BZ WBK's Auditor. The Committee performed a detailed review of the Deloitte proposal to perform the audit of the Bank's accounts for 2011. It reviewed the independence, effectiveness and objectivity of Deloitte, assessing the audit firm in Poland, the audit partner and audit teams. The Committee recommended to the Supervisory Board the appointment of Deloitte Audyt Sp. z o.o as the Bank's auditors subject to majority shareholder approval, and the recommendation was approved by force of the Supervisory Board's resolution of 17 May 2011.

The independent Auditors, Deloitte Audyt & KPMG Audyt sp. z o.o. sp. komandytowa (the Auditor of the Bank's financial statements for 2010), the Bank's Internal Auditor, the Chief Risk Officer, the Head of Legal and Compliance Division and the President were invited to attend all meetings. Other members of the Supervisory Board and Management Board are also invited to attend as appropriate in order to present reports. In addition, the Committee held separate meetings with members of the senior management and the external auditors to discuss issues relevant to the committee.

During 2011 the Committee worked closely with the Management Board on the appointment of a new Internal Auditor. In line with the Audit and Compliance Committee's recommendation, on 1 May 2011 the Management Board's President appointed Mr. Carlos Polaino-Izquierdo as Bank Zachodni WBK Group Internal Auditor. The Committee, through the Group Internal Auditor, receives objective independent reports on the operation of internal controls in the Group. The Committee reviewed the plans and work undertaken during the year in addition to the level and skills of the resources of the internal audit function. During 2011 the Group continued its Internal Audit Quality Assurance reporting in accordance with the International auditing standards. The Committee's members expressed their satisfaction that where areas requiring improvement were identified, they were incorporated into future reports and reflected in the audit processes.

The Committee reviewed and discussed the Bank's audited financial statements with the Management Board, which has primary responsibility for preparing the financial statements. It placed particular emphasis on their fair presentation and the reasonableness of the judgmental factors, in particular the level of IBNR provisions for each loan portfolio and the appropriateness of accounting policies used in their preparation. The Committee also reviewed and discussed with KPMG Audyt Sp. z o.o. sp. their independent review of the financial statements and issues raised with the Management Board.

In addition, the Committee continued its detailed review of the Group's capital, liquidity and risk frameworks against the requirements of the KNF stress test scenarios, Basel II and the volatility in the global financial markets. The Committee analysed the proposed assumptions, methodology and process followed in determining the amount of capital and liquidity required to support the delivery of the Group's business plans and its capital adequacy.

In reliance of these reviews and discussions, the Committee recommended the Supervisory Board the approval of the audited financial statements for inclusion in the Company's annual report for the year ended 31 December 2011. The Supervisory Board accepted the Committee's recommendation.

There is a process in place by which the Audit & Compliance Committee reviews and, if appropriate, signs off, within parameters approved by the Supervisory Board, any non-audit services undertaken by the Auditors, and the related fees. This ensures that the objectivity and independence of the Auditors are safeguarded.

In 2011, the Group did not record expenses related to KPMG Audyt audit services. The fees for other services which included advice on accounting and regulatory matters were PLN 1.97 mln.

In addition, the Group recorded expenses of PLN 2.16 mln for Deloitte Audyt audit services, which related to the statutory audit of the Group and Bank's financial statements and the audit of Group's subsidiaries and associates for 2011 pursuant to legislation. The fees for other services which included advice on accounting and regulatory matters were PLN 0.08 mln giving a total fee to Deloitte of PLN 2.24m.

In the Committee's opinion, the Group's external auditor provides effective, independent challenge to Management and that their management letter provides valuable recommendations for improvement of internal controls.

The Committee conducts a continuous review of its work and performance. The form of the review involved a discussion on the format of the meetings and the effectiveness of the reporting process.

Appendix no. 3

ASSESSMENT OF THE BZ WBK GROUP'S OPERATIONS IN 2011

- 2011 macroeconomic environment

Economic growth

In 2011 external conditions influencing the Polish economy altered considerably. The second half of the year saw a deterioration of global economic climate and a significant slowdown in economic growth of the euro zone and Germany. The euro zone's debt problems intensified, which triggered severe turmoil on the financial markets. The Polish economy proved quite resilient to weaker external demand, though an annual pace of growth of trade volume clearly declined over the year. The momentum of exports (denominated in euro) plunged from ca. 20%YoY at the beginning of the year to 5%YoY in Q4. The pace of growth of imports decreased even more. The current account deficit declined to ca. 4% of GDP, that is almost 1 percentage point lower compared to 2010.

The Polish economy performed quite well in 2011. The GDP increased during the past year by 4.3%, the most since the beginning of the world financial crisis in 2008. The main factors supporting the economic growth were rising household consumption (which advanced by 3.1% in 2011) and gross capital formation (8.7% gain in the whole year). While individual consumption was decelerating gradually towards the year end, among others due to the reversal of positive trends in the labour market and the rising cost of living, investments continued to accelerate through the year, reaching double-digit growth in Q4, the highest since mid-2008.

Labour market

The first half of 2011 saw an improvement of the situation in the Polish labour market. Average employment in the enterprise sector increased in H1 by ca. 4%YoY and the number of the employed according to LFS advanced by 1.5%YoY. The pace of wage growth was gradually accelerating, but it remained at a moderate level of nearly 5% in H1. Despite a higher number of job vacancies, unemployment rose in the first months of the year due to an increase in the total workforce. In H2 the positive trend reversed. The pace of employment growth in the enterprise sector decelerated to ca. 2%YoY and the pace of wage growth slightly declined. Weaker growth of wages and employment, offset only by a marginal increase of social benefits as well as rising inflation resulted in a lower growth of households' disposable income.

The registered unemployment rate stayed above the level from 2010 during the whole year and at the end of 2011 it reached 13.3%. The number of the registered unemployed approached again 2 million at the end of 2011. Also, the seasonally adjusted unemployment rate based on the LFS survey increased, reaching nearly 10% in H2 2011, the highest since March 2010.

Inflation

The increase of inflation in the first few months of 2011 was much faster and stronger than expected. In May, the CPI reached 5%, mainly due to higher prices of fuels and food in the global market. Last months of 2011 again showed higher inflation, which after a temporary decline to 3.9%YoY in September accelerated to 4.8%YoY in November and reached 4.6%YoY in December. Considerable depreciation of the zloty seen in H2 had a significant impact on higher retail prices through soaring prices of imported goods. Core inflation continued the upward trend observed since mid-2010. In December, CPI excluding food and energy prices reached 3.1%YoY, the highest since April 2002. Clear deterioration of economic outlook for Poland and global economy reduced the risk of materialisation of second round effects (resulting from the price-wage spiral).

Interest rates

The Monetary Policy Council increased interest rates four times during H1 2011 in response to rising inflationary pressure. Those hikes (each by 25bps) took place in January, April, May and June. Consequently, NBP's main reference rate increased to 4.5% at the end of Q2 from 3.5% at the end of 2010. Later in the year interest rates remained unchanged. Amid inflation persisting well above the NBP

target and pressure on zloty's depreciation the MPC maintained its informal hawkish bias in the monetary policy.

Credit market

During 2011 companies demonstrated strong demand for bank loans. The pace of growth of business loans reached almost 20%YoY at the end of Q4 versus close to zero at the beginning of 2011. Investment loans showed a particularly strong increase (by ca. 25%YoY, even after elimination of an impact of exchange rate fluctuations). The pace of growth of loans for households stabilised at a pretty high level, mainly due to strong demand for mortgage loans, while consumer loans remained in stagnation. After adjustment for FX fluctuation, the value of total loans for households increased in 2011 by ca. 7% with mortgage loans contributing most to that increase (growth by ca. 10%YoY).

Financial markets

During 2011, high volatility dominated the financial markets. In Q1, market sentiment was influenced by, among others, political turmoil in the Middle East and North Africa as well as earthquake and tsunami in Japan. Later in the year, investors' attention focused on the euro zone's debt problems and deteriorating outlook of global economic growth amid disappointment after macro data publication. Consequently, the zloty's exchange rate was very volatile. In mid-December, the Euro/PLN surged to the highest level since June 2009 (ca. 4.56). Though interventions of the NBP and the BGK (Bank Gospodarstwa Krajowego) helped the zloty to pare some losses at the end of the year, 2011 was not favourable for the domestic currency as on an annual basis the zloty lost 11.5% versus the euro.

Rising inflation and expected monetary policy tightening pushed short-term interest clearly up. Yields on the long end of the curve were rising amid risk aversion persisting on the global financial market and despite positive information on better-than-expected actual budget levels and low supply of long-term bonds on debt auctions.

Rating

- In the announcement dated 5 April 2011, Fitch Ratings upgraded Long-term Issuer Default Rating (IDR) of Bank Zachodni WBK from 'BBB+' to 'A+', removed the rating from Rating Watch Positive (RWP) and assigned a Stable Outlook. Fitch simultaneously upgraded Short-term Issuer Default Rating and Support Rating, and removed them from Rating Watch Positive.
- In the announcement dated 16 June 2011, Fitch Ratings affirmed all the above ratings.
- In the announcement dated 11 October 2011, Fitch Ratings affirmed its ratings for Bank Zachodni WBK (as announced on 5 April 2011, and confirmed on 16 June 2011) but changed the outlook on its long-term IDR from stable to negative. This was reflective of the downgrade of the long-term IDR rating of Banco Santander from "AA" to "AA-" due to increased sovereign risk of their home country (Spanish sovereign rating was downgraded from "AA+" to "AA-").

- On 22 December 2011, Fitch Ratings placed long-term and short-term IDR ratings of Bank Zachodni WBK on Rating Watch Negative following the same action towards its parent entity (announced on 20 December 2011) due to the likelihood of negative verification of the Spanish sovereign risk in the wake of the eurozone crisis.

Rating of Bank Zachodni WBK S.A. in 2012.

As of now the rating of Bank Zachodni WBK is as follows:

- Long-term IDR: 'A-', Outlook Negative
- Short-term IDR: 'F2'
- Viability Rating: 'bbb'

Assessment of the Internal Control System and the Risk Management system

- Assessment of Internal Control System

As required by the Statutes, the bank operates an internal control system which supports the decision-making processes and contributes to the bank's efficient operation, reliability of financial reporting as well as compliance with the law and internal regulations.

The bank's internal control system is adjusted to the bank's organisational structure and risk management system as well as to the size and complexity of the bank's business. It covers all units across the bank as well as its subsidiaries.

Internal control and risk management systems are structured into three lines of defence. Control measures under the first line check compliance with procedures and ad hoc/on-going response to any identified deficiencies or shortcomings. It underlies reviews of procedures and effectiveness of controls across the organization.

The second line of defence is formed by specialist units performing control functions which support the bank's management in risk identification and management and serve assessment of the first line controls.

The third line of defence is the Internal Audit Area which provides independent and objective examination as well as assurance on the first and second tier controls as well as on the bank's management system, including the effectiveness of managing the risk related to the bank's business. For that matter, Internal Audit verifies the adequate coverage of the Group's risks, in compliance with top management policies, applicable procedures and internal and external regulations. Using its own risk matrix and knowledge, IAA performs a regular assessment of the present and future risk across the bank and BZ WBK Group, developing audit annual plans to cover them. Also, priorities highlighted by the bank's management, the Audit and Compliance Committee, the external auditor, and banking supervision institutions are taken into account.

The Audit and Compliance Committee of the Supervisory Board exercises oversight over the Internal Audit Area. The Audit and Compliance Committee approves an annual audit plan and is regularly updated on audit results and progress in management actions.

As a result of the third line activity, the Management Board and the Supervisory Board receive current and accurate information on compliance with the law and internal regulations applicable in the Bank, effectiveness of identifying errors and irregularities as part of the internal control system, efficient management actions, completeness and correctness of accounting procedures as well as adequacy,

functionality and security of the IT system. The Risk Management Committee and the Audit and Compliance Committee are updated on a regular basis on the operation of the internal control system from the units of the second and third lines of defence which facilitates the on-going monitoring of the system's effectiveness.

Findings of control are taken account of and used to improve the existing processes and safety by making relevant changes to internal processes and regulations. The implementation of a necessary new process is regularly verified by Internal Audit Area.

- Assessment of risk management system

Bank Zachodni WBK has an integrated risk management framework ensuring that all risks having material impact on the Bank's operations are identified, measured, monitored and controlled. In the Supervisory Board's opinion, this framework is appropriately matched to the Bank's size and risk profile. The Bank optimizes the risk management framework on a regular basis, adapting it to the changing environment and risk profile associated with the planned strategy.

The responsibility for the management of individual risks was split between the Bank's organizational units that are supported by relevant Committees. The risk management strategy is set by the Risk Management Committee (RMC) overseeing the activity of other Committees having risk management authority. The fact that Members of Management Board and senior management sit on key Committees ensures high quality of management and consistent risk strategy.

One of the basic elements of the risk management framework of Bank Zachodni WBK is setting the levels of risk that the Bank is ready to accept in its day-to-day business. The acceptable risk level is expressed in the form of quantifiable limits set out in the "BZWBK Group Risk Appetite Statement" approved by the Management Board and Supervisory Board. The Bank conducts a detailed review of the limits with regard to the existing and potential risks, market conditions as well as the financial and capital plan at least once a year. Stress-testing and scenario analyses represent the key tool used to analyse the limits and ensure that the Bank retains an adequate capital position even in extreme and severe circumstances.

The Bank has methodologies and processes that identify and assess risks to identify their potential impact on the Bank's operations now and in the foreseeable future. With a view to identifying and assessing risks for the entire organisation, the review of material risks is carried out as part of the ICAAP process. In 2011, the review of material risks was combined with the review of BZWBK Group key risks to ensure a uniform approach to the identification of most significant threats to the Bank's operations at a given time.

Identified risks are managed using policies and best practices to keep them at an acceptable level. The Bank uses various risk assessment and measurement techniques depending on risk type and materiality, including the following key ones:

- customer and/or transaction grading models - for credit risk assessment purposes,
- VAR methodology - market risk,
- operational risk self-assessment methodology.

In 2011, the Bank carried out work aimed at adjusting its risk management policies and tools to Santander Group's standards with a special focus on ensuring compliance with regulations applicable to the Polish banking sector.

The comprehensive risk management framework is supported by a consistent and transparent system aimed at monitoring and reporting risk levels and excesses against defined limits. The reporting system covers key management levels. The Supervisory Board receives regular reports assessing the level of identified risks and reports assessing the effectiveness of actions taken by the Bank's Management Board.

The Bank strives to keep the right risk/reward balance. Support for the Bank's development strategy, while keeping top risk management standards, is amongst the key assumptions underlying the risk management process.

Appendix to the AGM resolution ..

OPINION OF THE MANAGEMENT BOARD OF BANK ZACHODNI WBK SPÓŁKA AKCYJNA WITH ITS REGISTERED SEAT IN WROCŁAW dated 2nd April 2012

regarding the waiver of the shareholders' pre-emptive rights in their entirety with respect to the proposed increase of the Bank's share capital through the issuance of the series I shares and the proposed issue price for the series I shares

Pursuant to Article 433 § 2 of the Act dated 15 September 2000 – the Commercial Companies Code (the “**CCC**”), the Management Board of Bank Zachodni WBK S.A., with its registered seat in Wrocław (the “**Bank**”), issued this opinion on 2nd of April, 2012 in relation to the proposed adoption by the Annual General Meeting of a resolution regarding the increase of the Bank's share capital through the issuance of 1,561,618 (one million, five hundred and sixty-one thousand, six hundred and eighteen) ordinary series I bearer shares (the “**Series I Shares**”), subject to the waiver of all the pre-emptive rights of the existing shareholders of the Bank with respect to all the Series I Shares .

1. Waiver of the pre-emptive rights with respect to the Series I Shares

The Series I Shares will be offered through private placement pursuant to Article 431, §2.1 of the CCC to the European Bank for Reconstruction and Development) (“**EBRD**”).

On 29 March 2012, the Bank, Banco Santander S.A. and EBRD executed an investment agreement (the “**Investment Agreement**”).

Under the Investment Agreement, EBRD agreed to subscribe for the Series I Shares at the issue price of PLN 212.60 (two hundred and twelve zlotys and sixty groszy) per one Series I Share, while the Bank agreed to take any and all actions necessary to issue the Series I Shares and to procure their admission and introduction to trading on the regulated market maintained by the Warsaw Stock Exchange.

In light of the above, for the Bank to comply with its obligations under the Investment Agreement and in order to permit EBRD to perform its obligation thereunder, it is necessary and reasonable to waive the pre-emptive rights of the existing shareholders of the Bank in their entirety with respect to the Series I Shares.

The Bank's Management Board believes that the issuance of the Series I Shares addressed to EBRD will:

- strengthen the Bank's capital base and capital adequacy ratio;
- give a clear indication of the type support from a highly reputed financial institution the Bank is to receive prior to the planned merger between the Bank and Kredyt Bank S.A.;

- contribute to the increase of the Bank's free float on the regulated market operated by the Warsaw Stock Exchange (*Giełda Papierów Wartościowych w Warszawie S.A.*) and improve the market perception of the Bank;
- strengthen the Bank's cooperation with EBRD, who already provided the Bank with Euro term funding of EUR 100 million under subordinated bonds with maturity in 2020;
- through partnership with EBRD, allow the Bank to gain access to new markets / forms of activity; and
- create new possibility of financing small and medium-sized enterprises as per EBRD's intention to invest significant funds in the development of the financial sector in Poland to facilitate long-term financing of SMEs.

Therefore, the Management Board is of the opinion that the issuance of the Series I Shares subject to the waiver in their entirety of the pre-emptive rights of the existing shareholders of the Bank is in the interest of the Bank. Moreover, the Management Board believes that the nature of the issue of the Series I Shares justifies the waiver of the pre-emptive rights of the existing shareholders with respect to the Series I Shares and that it is a consequence of the objective of the issue. Consequently, the Management Board expresses its positive opinion on the issuance of the Series I Shares subject to the waiver of the pre-emptive rights of the existing shareholders of the Bank in their entirety.

2. Proposed issue price for the Series I Shares

The proposed issue price for the Series I Shares amounts to PLN 212.60 (two hundred and twelve zlotys and sixty groszy) per one Series I Share.

The proposed issue price for the Series I Shares complies with the issue price determined in the Investment Agreement.

The proposed issue price for the Series I Shares represents the reference price for the BZ WBK shares of PLN 226.40 (two hundred and twenty-six zlotys and forty groszy) agreed in the investment agreement entered into by Banco Santander S.A. and KBC Bank NV, ex-dividend and, with a discount similar to customary discounts applicable in private placement transactions.

In light of the above, the Management Board believes that the determination of the issue price for the Series I Shares at PLN 212.60 (two hundred and twelve zlotys and sixty groszy) per one Series I Share is reasonable and in the Bank's interest.

3. Conclusions

In light of the premises stated above, the Management Board recommends that the Annual General Meeting adopt the resolution.
