\*\* details presented in Note 51

## VI. Additional information to the consolidated financial statements

### 1. General information on Kredyt Bank S.A.

Kredyt Bank Spółka Akcyjna ('Kredyt Bank S.A.', 'Bank', 'parent company') with its registered office in Warsaw (Poland), ul. Kasprzaka 2/8, was established in 1990 and entered in the register of entrepreneurs maintained by the District Court for the Capital City of Warsaw under No. KRS 0000019597.

On the date of making the entry to the National Court Register concerning the merger of Kredyt Bank S.A. and Bank Zachodni WBK S.A. ('BZ WBK S.A.'), i.e. 04.01.2013, Kredyt Bank S.A. ceased to be an autonomous business entity and was deleted from the National Court Register.

Kredyt Bank S.A. was a universal bank which provided banking services addressed and tailored to the needs of all customer groups. A wide range of the Bank's services was addressed to individual customers, business entities and local authorities. The Bank provided convenient access to its services via an extended network of banking outlets and ATMs as well as an Internet banking system.

Consolidated financial statements of Kredyt Bank S.A. Capital Group ('Capital Group', 'Group') for the year ended on 31.12.2012 comprise the financial statements of the Bank and its subsidiaries.

Below, there are subsidiaries, which, as at 31.12.2012, were consolidated with the full method.

Parent company	Seat		
Kredyt Bank S.A.	Warsaw		
Subsidiary	Seat	Share (%) in votes at GMS as at 31.12.2012	Share (%) in votes at GMS as at 31.12.2011
1. Kredyt Lease S.A.	Warsaw	100.00	100.00
2. Kredyt Trade Sp. z o.o. w likwidacji	Warsaw	100.00	100.00

Due to the declaration on 14.08.2012 by Reliz Sp. z o.o. of bankruptcy by liquidation of its assets and the take-over of the company's management by the trustee in bankruptcy, pursuant to the definition stated in IAS 27, the Bank lost control of Reliz Sp. z o.o. As a result, as at 31.12.2012, the company was not consolidated.

As at 31.12.2011, Reliz Sp. z o.o. was consolidated with the full method.

On 21.06.2012, Kredyt Trade Sp. z o.o. signed the final agreement on the sale of its 30% stake in KBC TFI S.A. to KBC Asset Management NV and completed the transaction.

In the Group's consolidated financial statements for 2011, KBC Towarzystwo Funduszy Inwestycyjnych S.A. was consolidated as an associate measured with the equity method.

As at 31.12.2012, the Group also held 100% of shares in BFI Serwis Sp. z o.o. and Lizar Sp. z o.o., which were not consolidated as the range of their operating activities as well as their financial figures were not material.

### **KBC Banking and Insurance Capital Group**

As at 31.12.2012, Kredyt Bank S.A. was a subsidiary of KBC Banking and Insurance Capital Group ('KBC Group') established in 1998 as a result of a merger of ABB Insurance Group, Almanij-Kreditbank Group and CERA Bank Group. As at 31.12.2012, KBC Group held 80.0% of shares of Kredyt Bank S.A. KBC Group has been operating in the present structure since 2005, i.e. the merger of KBC Bank and

Insurance Holding Company with Almanij. The shares of KBC Group NV are listed on the Euronext Stock Exchange in Brussels.

KBC Group focuses on bancassurance-type operations for individual customers, provides services to businesses, is involved in assets management and other types of market activities. It is one of the three largest banking and insurance companies on its home market in Belgium.

In Poland, KBC Group is a sole shareholder of KBC TFI S.A. and PTE Warta S.A.

On 27.02.2012, KBC Bank NV and Banco Santander S.A. signed an investment agreement in which the parties expressed their intention to merge Kredyt Bank S.A. and Bank Zachodni WBK S.A.. On the same day, Kredyt Bank S.A., BZ WBK S.A., KBC Bank NV and Banco Santander S.A. signed an agreement on starting work to merge Kredyt Bank S.A. and BZ WBK S.A.

On 04.12.2012, the Komisja Nadzoru Finansowego (Polish Financial Supervision Authority, 'KNF') issued a decision pursuant to Article 124 clause 1 of the Banking Law granting consent to the Bank's merger with Bank Zachodni WBK S.A.

On 04.01.2013, an entry was made in the National Court Register concerning the merger of Bank Zachodni WBK S.A. and Kredyt Bank S.A.

Further information concerning the said issue is presented in Note 61.

## **2. Basis of preparation of consolidated financial statements**

### **2.1. Declaration of compliance with the IFRS**

Pursuant to Article 55 clause 5 of the Accounting Act of 29 September 1994 (consolidated text: Journal of Laws of 2009, No. 152, item 1223, as amended) ('the Act'), starting from 01.01.2005, the consolidated financial statements of the Group have been prepared in compliance with the International Accounting Standards ('IAS') and the International Financial Reporting Standards ('IFRS') that were approved by the European Union ('EU').

Pursuant to Article 45 clause 1c of the Act and under the decision of the General Meeting of Shareholders of Kredyt Bank S.A. of 25.04.2005, from 01.01.2005, also the standalone financial statements of the Bank have been prepared in accordance with the IAS/IFRS.

Consolidated financial statements of the Group for the year ended on 31.12.2012 have been prepared in accordance with the IAS and the IFRS in force as at 31.12.2012 approved by the EU. Matters not governed by the above-mentioned standards are regulated by the Act and executive regulations thereto.

The IFRS include standards and interpretations approved by the International Accounting Standards Board ('IASB') and the International Financial Reporting Interpretations Committee ('IFRIC').

### **2.2. Other information about the financial statements**

The consolidated financial statements have been prepared based on the assumption that the Group would remain a going concern in the foreseeable future of at least 12 months from the balance sheet date. Due to the merger of Kredyt Bank S.A. and BZ WBK S.A., the Group's operations will be continued as part of the business of BZ WBK S.A. Group. As at the approval date of the consolidated financial statements, the existence of circumstances which could threaten the continuation of the business of the Group is not confirmed.

On 20.12.2012, the Management Board of Giełda Papierów Wartościowych w Warszawie S.A. (the 'Warsaw Stock Exchange', 'WSE') adopted Resolution No. 1326/2012 concerning the suspension of the trade in the shares of Kredyt Bank S.A. on the Main Market of the WSE due to the upcoming date of its merger with Bank Zachodni WBK S.A.

As at 31.12.2012, the liquidation procedure concerning a subsidiary Kredyt Trade Sp. z o.o. did not have any significant impact upon the continuation of the Group's business within the present scope.

Furthermore, as at 31.12.2012, the Bank was in the process of the merger with Bank Zachodni WBK S.A., and on 04.01.2013, an entry was made in the National Court Register concerning the merger of Bank Zachodni WBK S.A. and Kredyt Bank S.A.

In the second half of 2012 Polish Financial Supervision Authority carried out the comprehensive inspection based on the data as at 30.06.2012. Issues identified during the inspection did not have material impact on the net result reported in the Interim Consolidated Financial Statement for the First Half of 2012 ended on 30.06.2012. These consolidated financial statements of Kredyt Bank S.A. Capital Group were approved for publication by the Management Board of Bank Zachodni WBK S.A. on 07.03.2013.

These consolidated financial statements were audited by Ernst & Young Audit sp. z o.o., the key certified auditor acting on behalf of the authorized entity. The audit was performed in accordance with the Polish law and the national auditing standards issued by the National Council of Statutory Auditors

The Polish zloty was the functional currency of the Group's companies. These consolidated financial statements have been presented in the Polish zloty ('PLN'), and all values, if not stated otherwise, are presented in thousands.

Consolidated Financial Statements have been prepared on the basis of historical costs except for the financial assets and liabilities at fair value through profit or loss, receivables from customers and financial assets measured at amortized cost taking into account impairment losses, deposits measured at amortized cost, financial instruments available for sale and measured at fair value through revaluation reserve and non-current assets classified as held for sale measured at the lower of its carrying amount as at the date of its classification to this category or at fair value less costs to sell.

Accounting principles adopted to prepare financial statements were applied in a continuous manner in all presented periods.

### **3. Description of major accounting policies applied for the purpose of preparing consolidated financial statements**

#### **3.1. New or amended IAS and IFRS and new IFRIC interpretations**

Below, we present new or amended IAS's and IFRS's and new IFRIC interpretations that the Group applied in this period. Their application has not materially affected the consolidated financial statements:

- Amendments to IFRS 7 *Financial Instruments: Disclosures: Transfer of Financial Assets* – applicable to annual periods beginning on 1 July 2011 or later;

The following standards and interpretations have been issued by the IASB or the IFRIC, however are not in force yet:

- Phase 1 of IFRS 9 *Financial Instruments* – applicable to annual periods beginning on 1 January 2015 or later; by the date of the approval of these consolidated financial statements, not approved by the EU;
- Amendments to IAS 19 *Employee benefits* – applicable to annual periods beginning on 1 January 2013 or later;
- Amendments to IAS 1 *Presentation of Financial Statements: Presentation of Items of Other Comprehensive Income* – applicable to annual periods beginning on 1 July 2012 or later;
- Amendments to IFRS 1 *First-time Adoption of the International Financial Reporting Standards – Severe Hyperinflation and Removal of Fixed Dates for First-time Adopters* – applicable starting from annual periods beginning on 1 January 2013 or later;
- Amendments to IAS 12 *Income Taxes - Deferred Tax: Recovery of Underlying Assets* – applicable starting from annual periods beginning on 1 January 2013 or later;

- IFRS 10 *Consolidated Financial Statements* – applicable starting from annual periods beginning on 1 January 2014 or later;
- IFRS 11 *Joint Arrangements* – applicable starting from annual periods beginning on 1 January 2014 or later;
- IFRS 12 *Disclosure of Interests in Other Entities* – applicable starting from annual periods beginning on 1 January 2014 or later;
- Amendments to IFRS 10, IFRS 11 and IFRS 12 *Transition Guidance* – applicable to annual periods beginning on 1 January 2013 or later; by the date of the approval of these consolidated financial statements, not approved by the EU;
- IFRS 13 *Fair Value Measurement* – applicable to annual periods beginning on 1 January 2013 or later;
- IAS 27 *Separate Financial Statements* – applicable starting from annual periods beginning on 1 January 2014 or later;
- IAS 28 *Investments in Associates and Joint Ventures* – applicable starting from annual periods beginning on 1 January 2014 or later;
- IFRIC 20 *Stripping Costs in the Production Phase of a Surface Mine* – applicable to annual periods beginning on 1 January 2013 or later;
- Amendments to IFRS 7 *Financial Instruments: Disclosures: Offsetting Financial Assets and Financial Liabilities* – applicable to annual periods beginning on 1 January 2013 or later;
- Amendments to IAS 32 *Financial Instruments: Presentation: Offsetting Financial Assets and Financial Liabilities* – applicable to annual periods beginning on 1 January 2014 or later;
- Amendments to IFRS 1 *First-time Adoption of the International Financial Reporting Standards: Government Loans* – applicable to annual periods beginning on 1 January 2013 or later; by the date of the approval of these consolidated financial statements, not approved by the EU;
- Amendments resulting from the IFRS review (published in May 2012) – applicable to annual periods beginning on 1 January 2013 or later; by the date of the approval of these consolidated financial statements, not approved by the EU;
- Amendments to IFRS 10, IFRS 12 and IAS 27 *Investment Entities* (published in October 2012) – applicable to annual periods beginning on 1 January 2014; by the date of the approval of these consolidated financial statements, not approved by the EU.

The Group does not predict that the introduction of the above standards and interpretations will materially affect the Group's accounting principles (policy), except for the changes which will result from the implementation of IFRS 9. With reference to the planned amendments to the published part of IFRS 9 (related to the so-called Phase 1) and the drafts of IFRS 9 (concerning the so-called Phase 2 and Phase 3), the Bank withheld the works on the estimation of the impact of IFRS 9 upon the consolidated financial statements.

### **3.2. Consolidation of financial statements**

Consolidated financial statements include the financial statements of Kredyt Bank S.A. and the financial statements of subsidiaries for the period of 12 months ended on 31.12.2012. Financial statements of subsidiaries are prepared for the same reporting period as the financial statements of the parent company.

A part of the Group's companies keep their accounting books according to the accounting policy (principles) set out in the Act and executive regulations thereto ('Polish Accounting Standards'). Consolidated financial statements include respective adjustments made to make financial figures of these companies more consistent with the principles applied in the parent company. Balances and transactions between intragroup companies, unrealized profits or losses resulting from intragroup transactions have been eliminated.

### 3.2.1. Subsidiaries

Subsidiaries are all entities, in relation to which the Bank may, directly or indirectly, exert control and govern their financial and operating policies in order to gain benefits from their businesses.

### 3.3. Associates

Associates are entities not controlled by the Group in terms of their financial or operational policies, but the Group exerts a significant influence upon them, which is often accompanied by 20%-50% stake in the total number of votes within their decision-making bodies. Investments in shares in associates are initially recognized in the balance sheet at cost and further on, they are measured with the equity method.

### 3.4. Transactions in foreign currencies

Transactions in foreign currencies are translated into PLN at the exchange rate as at the transaction date. Monetary assets and liabilities expressed in foreign currencies, recognized at historical cost, are translated into PLN at the average exchange rate of the National Bank of Poland as of the balance sheet date. Gains/losses from the translation of the resulting currency translation differences are recognized in the income statement.

Non-monetary assets and liabilities expressed in foreign currencies, recognized at historical cost, are translated into PLN at an exchange rate as at the transaction date, and items carried at fair value are translated at the average exchange rate of the National Bank of Poland (NBP) as of the measurement date. Currency translation differences on non-monetary items measured at fair value through profit or loss are recognized in net trading income.

Below, we present NBP's average rates of exchange applied by the Group to translate balance sheet items at the ends of particular periods.

	31.12.2012	31.12.2011
<b>EUR</b>	4.0882	4.4168
<b>USD</b>	3.0996	3.4174
<b>CHF</b>	3.3868	3.6333

### 3.5. Recognition of financial assets and liabilities in the balance sheet

The Group recognizes financial assets and liabilities in the balance sheet only when it is a party to a transaction.

Sale/purchase transactions related to financial assets valued at fair value through profit or loss, held-to-maturity investments and available-for-sale financial assets are recognized in the balance sheet always on the date of the transaction settlement. Loans and receivables are recognized at the time of the payment of cash to the borrower.

### 3.6. Derecognition of financial assets from the balance sheet

The Group derecognizes financial assets from the balance sheet when and only when contractual rights to cash flows from such assets expire or when the Group transfers a financial asset pursuant to paragraphs 18 and 19 of IAS 39, and the transfer meets the requirements for the derecognition from the balance sheet provided for in paragraph 20 of IAS 39. Particularly, the Group writes off loan receivables from the balance sheet to impairment losses when such receivables are uncollectible receivables, particularly when:

- the costs of further debt recovery will exceed the expected proceeds from debt recovery;

- the ineffectiveness of the Group's debt recovery process is confirmed with a respective document issued by a respective enforcement body;
- the debtor's assets that can be subjected to enforcement, and the debtor's whereabouts cannot be established;
- claims are lapsed.

Following the decision on derecognition of an asset, the Group fails to undertake any further debt recovery action, and any possible proceeds from a given asset are only of incidental nature.

### **3.7. Classification and measurement of financial assets and liabilities**

#### **3.7.1. Financial assets and liabilities at fair value through profit or loss**

This category includes:

- assets or liabilities held for trading, i.e. those acquired or contracted with the intention to sell or repurchase them in the nearest future. This category comprises portfolios of the financial assets and liabilities portfolios managed jointly in order to generate profits in a short time horizon. This category also includes derivatives;
- financial assets or liabilities designated by the Group's entities upon initial recognition as measured at fair value through profit or loss as the items are managed on the basis of the valuation at fair value, pursuant to the recorded risk management principles or investment strategy of the Group.

Interest and acquired discount or premium on debt securities is settled over time in net interest income based on the effective interest rate method. Securities are carried at fair value, and its change is recognized in the profit/loss on financial operations.

Net gains from assets disposal are calculated with the FIFO method.

Derivatives are recognized at fair value, without deductions of transaction expenses that can be incurred at the disposal. The valuation of derivatives also entails credit risk; the respective charges are recognized in the income statement.

Derivatives with positive valuation as at the date of measurement are recognized in the balance sheet as assets, and derivatives with negative valuation from measurement – in liabilities.

#### **3.7.2. Held-to-maturity investments**

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments, or fixed maturity that the Group's entities intend and are able to hold to maturity or by the date very close to maturity, different from:

- a) designated by an entity upon initial recognition as at fair value through profit or loss;
- b) designated by an entity as available-for-sale; and
- c) meeting the definition of loans and receivables.

Held-to-maturity investments are measured at amortized cost using the effective interest rate method, taking account of impairment losses. Accrued interest and settled discount or premium is recognized in net interest income.

#### **3.7.3. Loans and receivables**

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market, other than:

- a) financial assets that the company intends to sell immediately or in the near term, which are classified as held for trading, and those that the company upon initial recognition designates as at fair value through profit or loss;

- b) financial assets that the company upon initial recognition designates as available-for-sale, or
- c) financial assets for which the holder may not recover substantially all of its initial investment, other than because of credit deterioration, which are classified as available-for-sale.

Loans and receivables are measured in the balance sheet at amortized cost based on the effective interest rate method, taking account of impairment losses.

Accrued interest with net commission (commissions received less commissions paid) are settled over time using the effective interest rate method and are recognized in interest income. Impairment losses are recognized in the income statement in correspondence with accounts of provisions which adjust assets value.

In the case of the customers for whom the possibilities of servicing loans within the time limits specified in agreements deteriorated, and whose conditions of the debt service are renegotiated, as a principle, the Bank, having regard for the new conditions, re-estimates the discounted cash flows. If the present value of estimated future cash flows discounted using the effective interest rate method is not significantly lower than before the renegotiation, a given loan will remain in the portfolio of exposures with no evidence for impairment. Otherwise, a loan is classified in the portfolio of loans with evidence for impairment.

#### **3.7.4. Financial assets available for sale**

Financial assets available for sale are non-derivative financial assets designated as available for sale or not classified as financial assets valued at fair value through profit or loss, loans and receivables or held-to-maturity investments.

Available-for-sale financial assets are measured at fair value on the balance sheet. Changes in fair value are recognized in revaluation reserve until the financial asset is derecognized or impairment is recognized; then accumulated gains/losses included in equity are recognized in the income statement. In the case of debt securities, interest income and discount or premium is settled over time in net interest income using the effective interest rate method.

Dividends from available-for-sale equity instruments are recognized in the income statement at the time when the right to obtain them arises.

Net gains from assets disposal are calculated with the FIFO method.

If fair value of equity instruments cannot be determined, then assets are recognized at cost less impairment loss.

A significant or prolonged decrease in the fair value of an investment in the equity instrument in the portfolio of available-for-sale financial assets below cost constitutes objective evidence for impairment. Impairment losses are recognized in the income statement in correspondence with accounts of provisions which adjust assets value and in case of equity instruments are not subject to reversal.

#### **3.7.5. Financial liabilities other than measured at fair value through profit or loss**

This category includes amounts due to banks and customers, loans borrowed by the Group, own debt securities issued, liabilities arising from repurchase transactions and subordinated liabilities, following the deduction of transaction expenses.

Financial liabilities other than measured at fair value through profit or loss are recognized in the balance sheet at amortized cost with the application of the effective interest rate method.

#### **3.7.6. Hedge accounting**

Hedge accounting recognizes the effects of compensating for changes in fair value of the hedging instrument and the hedged item, which exert an impact on the income statement. According to adopted hedge accounting principles, the Group designates certain derivatives to hedge fair value and future cash flows of specific assets, on condition that the criteria provided for in IAS 39 are met. Hedge accounting is applied in the Group to hedge certain items, when all the following criteria are met:

- upon the inception of hedge, the Group officially determines and documents hedging relations as well as the purpose of risk management and the strategy of hedge. The documentation identifies the hedging instrument, the hedged item or transaction, the nature of the hedged risk and the method of the Group's assessment of hedging instrument effectiveness in offsetting the risk of changes in fair value of the hedged item or cash flows related to the hedged risk;
- the hedging is expected to be highly effective in achieving offsetting changes in fair value (or cash flows) attributable to the hedged risk, according to the initially documented risk management strategy related to a specific hedging relationship;
- in the case of the cash flow hedge, the planned hedged transaction must be highly probable and must be subject to the threat of changes in the cash flow which, as a result, may affect the income statement;
- the hedge effectiveness may be assessed reliably, i.e. fair value or cash flows attributable to the hedged item resulting from the hedged risk and the fair value of the hedging instrument may be measured reliably;
- the hedge is assessed on an ongoing basis and is found highly effective in all reporting periods in which the hedge was established.

Fair value hedge, which meets hedge accounting conditions, is recognized by the Group as follows:

- gains or losses resulting from the revaluation of fair value of a hedging derivative are recognized in the income statement;
- gains or losses related to the hedged item, resulting from the hedged risk, adjust the carrying amount of the hedged item and are recognized in the income statement.

Future cash flows hedge, which meets hedge accounting conditions, is recognized by the Group as follows:

- a portion of gains or losses associated with the hedging instrument, which constitutes an effective hedge, is recognized directly in equity;
- a non-effective portion of gains or losses associated with the hedging instrument is recognized in the income statement.

Interest income and expenses on derivatives used as hedging instruments is recognized in the income statement in interest income/expense lines respectively.

### **3.7.7. Embedded derivatives**

An embedded derivative is a component of a combined (hybrid) instrument that also includes a non-derivative host contract, with the effect that some of the cash flows of the combined instrument vary in a way similar to the stand-alone derivative.

An embedded derivative is separated from the host contract and accounted for as a derivative only if:

- the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristic and the risks of the host contract;
- a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and
- a hybrid (combined) instrument is not carried at fair value and changes in fair value are not recognized in the income statement.

When an embedded derivative is separated, the host contract is accounted for in accordance with accounting principles appropriate for such a contract.

### **3.8. Finance lease receivables**

Lease contracts under which the Group generally transfers all the risks and rewards related to the possessed assets are recognized by the Group as finance lease contracts. Receivables due under finance lease contracts are presented by the Group in the balance sheet in the amount equal to net leasing investment, as loans and advances to customers.

Interest income under finance lease contracts is settled with the effective interest rate method in order to reflect the constant, in a given period, rate of return on net leasing investment.

### **3.9. Offsetting financial instruments**

Financial assets and liabilities are offset and the net amount reported in the balance sheet, when the Group has a legally enforceable right to offset the recognized amounts and intends to settle it on a net basis, or realize the asset and settle the liability simultaneously.

### **3.10. Sale and repurchase agreements**

Securities sold under repurchase agreements ('repos' and 'sell buy back') are not excluded from the balance sheet. Payments due to the counterparty are recognized as financial liabilities as 'Liabilities arising from repurchase transactions'. Securities purchased under repurchase agreements ('reverse repos' and 'buy sell back') are reported in 'Receivables arising from repurchase transactions'. The difference between the sale and repurchase prices is treated as interest and accrued over the life of the agreements using the effective interest method.

### **3.11. Property, plant and equipment**

Property, plant and equipment are the fixed assets that are complete, prepared for direct use, with a foreseeable useful life of over one year, held by the Group and used by it. They are recognized in the balance sheet at cost less depreciation and impairment losses.

Property, plant and equipment also include construction in progress and property, plant and equipment put into use under a contract of operating lease as well as property, plant and equipment obtained for use under a contract of finance lease.

Property, plant and equipment not used by the Group, but classified as held for sale, are recognized in the balance sheet at the lower of: carrying amount as at the classification in this category and fair value less selling costs and classified as 'Non-current assets held for sale'.

Fixed assets at the time of their acquisition are divided into components which are items of material significance (components) and which can be assigned a separate period of useful life.

#### **3.11.1. Capital expenditure incurred in a future period**

The Group recognizes, in the carrying amount of property, plant and equipment, expenses of the increase in value or of the replacement of parts of property, plant and equipment at the time of their incurrence, when it is probable that the Group will generate greater future economic benefits associated with this asset and the cost of improvement or replacement may be measured reliably. All other expenses are charged to the income statement during the financial period in which they are incurred.

#### **3.11.2. Depreciation**

Items of property, plant and equipment are depreciated with the straight-line method in line with the depreciation schedule. The period of economic useful life is taken into consideration while determining

the depreciation period and the annual depreciation rate. Land is not depreciated. Items of property, plant and equipment that are used together, but which have various useful lives, are depreciated separately.

Estimated periods of expected economic useful life of property, plant and equipment:

Buildings	40 years
Leasehold improvements	for the term of the contract or 10 years
Motor vehicles	6 years
Plant and machinery	3 – 10 years
Other property, plant and equipment	5 years

The assets' residual values and useful lives are reviewed on, at least, an annual basis. Moreover, the Group carries out an annual analysis of the evidence indicating impairment for particular classes of property, plant and equipment.

### **3.12. Intangible assets**

An intangible asset is an identifiable non-monetary asset without physical substance.

Intangible assets are assets, which comply with the following criteria:

- they can be separated from a business unit and sold, transferred, licensed or given for gratuitous use to third parties, both individually and jointly with related agreements, assets or liabilities; or
- they arise from contracts or other titles, irrespective of whether they can be transferred or separated from a business unit.

Intangible assets, held by the Group and used by it, are recognized in the balance sheet at cost less accumulated amortization and impairment losses.

The Group's costs incurred to internally generated intangible assets for own use from which, according to expectations, the entity will generate future economic benefits and which meet other recognition criteria specified in IAS 38, are also recognized as intangible assets in the balance sheet. Direct costs of the production of intangible assets activated in this way are amortized in the estimated useful life not exceeding 5 years.

The Group's companies recognize, in the carrying amount of intangible assets, expenses of the increase in value or replacement of the parts of such assets at the time of their incurrence, when it is probable that such companies will generate greater future economic benefits associated with this asset and the cost of improvement or replacement may be measured reliably. All other expenses are charged to the income statement during the financial period in which they are incurred.

#### **3.12.1. Computer software**

Acquired computer software licenses are recognized as intangible assets at costs incurred to acquire and bring to use the specific software.

The Group's expenditures on maintenance and technical service of computer software are recognized as expense as incurred.

#### **3.12.2. Other intangible assets**

Other intangible assets are recognized by the Group in the balance sheet at cost less accumulated amortization and any impairment losses.

#### **3.12.3. Amortization**

Intangible assets are amortized with the straight-line method according to the amortization schedule. The economic useful life is taken into consideration while determining the amortization period and the annual

amortization rate. Estimated periods of the expected useful life for intangible assets are generally equal to 5 years, but may be adjusted when the Group estimates that a given asset will be used for a different period of time.

Amortization rates resulting from the tax regulations in force are applied for the purpose of tax settlements.

The Group does not have any intangible assets with an indefinite useful life.

### **3.13. Investment properties**

Under IAS 40, the Group recognizes investment properties at cost.

### **3.14. The methods of the measurement of impairment of assets other than financial assets**

Carrying amounts of particular assets are periodically tested for impairment. If the Group identifies evidence for impairment, further it determines whether the present book value of a given asset is higher than the value that can be obtained from its further use or sale, i.e. the recoverable amount of a given asset is established. If the recoverable amount is lower than the present carrying amount of a given asset, impairment loss is accounted for in the income statement.

#### **3.14.1. Measurement of recoverable amount**

A recoverable amount of an asset is determined as the higher of the following: a price that can be obtained from the sale less costs of sale and value in use of a given asset. Value in use is determined as estimated future cash flows generated by a given asset discounted with the market rate and increased with the margin for the risk specific for a given class of assets.

Cash-generating units (CGU), i.e. groups of financial assets and liabilities directly attributable to goodwill and generating cash inflows independent of other groups, are separated for the purpose of goodwill impairment tests. If negative trends in the generated flows are identified, the impairment of the whole group of assets and liabilities is measured and recognized in attributed goodwill.

The analysis of circumstances and any possible impairment tests for property, plant and equipment and intangible assets are performed at least once a year. The impairment test for goodwill is performed annually, regardless of whether the evidence for impairment was present or not.

#### **3.14.2. Reversal of impairment**

In the case of assets held by the Group's companies, except for equity instruments classified as available for sale, impairment losses may be reversed if evidence for impairment ceases to exist or the parameters taken into account in estimates of recoverable amount are changed.

Impairment loss may be reversed only up to the carrying amount of an asset, which, having regard for accumulated depreciation, would have been determined if the impairment charge had not been made.

### **3.15. Trade and other receivables**

Trade and other receivables are reported in the amount due less impairment.

In the case when the impact of time value of money (TVM) is material, the value of receivables is determined by discounting forecasted future cash flows to present value, applying a discount rate corresponding to present market valuations of time value of money. In the case the discounting method was applied, the increase in receivables due to the elapse of time is recognized as other operating income.

### **3.16. Assets taken over for debts**

Assets taken over for debts are measured at their fair value, including the cost of sale. If fair value of assets taken over is lower than the nominal value of receivables, an impairment charge is recognized. If the selling price of the assets is higher than debt, the difference constitutes a liability towards the borrower.

### **3.17. Non-current assets held for sale**

The Group classifies a non-current asset (or a disposal group) as held for sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use.

Pursuant to IFRS 5, assets held for sale are measured at the lower of: present carrying amount or fair value less costs to sell. Non-current assets, when they are classified as held for sale, are not depreciated.

### **3.18. Deferred tax asset and liability**

Deferred tax asset is recognized for all deductible temporary differences as well as for carry forward of unused tax credits and unused tax losses to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized.

The carrying amount of a deferred tax asset is reviewed at each balance sheet date and is subject to a respective decrease by the amount, which corresponds to the lower degree of the probability of generating taxable income or partial or total utilization of a deferred tax asset.

Deferred tax liability is recognized for all taxable temporary differences. Deferred tax asset and deferred tax liability are measured at tax rates that are expected to apply to the period when an asset is realized or a liability settled, based on tax rates (and tax laws) in force as at the balance sheet date or certain to be in force in the future as at the balance sheet date. Deferred tax liability is not discounted.

Deferred tax related to items recognized directly in equity is also charged or credited directly in equity at the present tax rate.

The Group's companies offset deferred tax asset against deferred tax liability.

### **3.19. Cash and cash equivalents**

For the purpose of the cash flow statement, cash and cash equivalents include short-term balances used to settle short-term monetary liabilities, with less than three months maturity from the date of acquisition, including cash and balances with Central Bank and other qualifying short-term receivables, including term deposits on the interbank market.

### **3.20. Provisions**

The Group recognizes provisions in the balance sheet when:

- an entity has a present obligation (legal or constructive) as a result of past events;
- it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation; and
- a reliable estimate can be made of the amount of the obligation.

The provision is recognized at the amount of the estimated outflow of cash. The amount of the provision is determined as the value of the discounted future cash flow for the period after which the provision will be utilized.

### **3.20.1. Restructuring provision**

Pursuant to IAS 37, the Group recognizes a restructuring provision in the balance sheet for evidenced costs of restructuring. The provision is made on the basis of a detailed, official and published restructuring plan. The provision does not include future operating expense.

### **3.20.2. Employee benefits**

The Group does not offer a specific pension scheme for its employees, thus has no commitments to its employees in this respect. The Group's entities, as employers, fulfilling the obligations indicated in the law, are obliged to withhold and pay social security and health insurance contributions for its employees and contributions to the Labor Fund and the Guaranteed Employee Benefits Fund. These payments are a part of short-term employee benefits, including remuneration, bonuses. Short-term benefits are recognized in general expenses under general principles.

A provision for retirement severance pays, which is determined annually by actuarial calculations is the only component of long-term employee benefits.

## **3.21. Equity**

Equity comprises capitals and own funds established pursuant to the specific legal regulations, i.e. applicable laws.

### **3.21.1. Share capital**

Registered share capital is recognized at nominal value according to the Bank's Memorandum and Articles of Association and the entry in the Court Register.

### **3.21.2. Supplementary capital**

Supplementary capital is established pursuant to the Bank's Memorandum and Articles of Association from profit allowances and from issue premiums generated from the issue of shares, and is allocated to cover balance sheet losses that may result in relation to the Bank's operations, and from profit allowances obtained after the purchase date in the Group's companies.

### **3.21.3. Revaluation reserve**

Revaluation reserve is established as a result of the valuation of financial assets classified as 'available-for-sale' and of an effective portion of the valuation of financial instruments designated for cash flow hedge.

### **3.21.4. Other reserves**

Other reserves comprise the general banking risk reserve established pursuant to the Banking Law of 29.08.1997 (Journal of Laws of 2002, No. 72, item 665, as amended, 'Banking Law') from profit after tax and are designated for unidentified risks of the Bank's operations.

Equity also comprises net profit/loss for the period and retained profit or loss from previous periods. In the case of subsidiaries, the Group's equity also comprises net profit/loss of such companies generated from the date of their acquisition by the parent company.

### 3.22. Granted off-balance sheet liabilities

Within its operations, the Group enters into transactions, which, at the time of their conclusion, are not recognized in the balance sheet as assets or liabilities, but result in contingent liabilities. A contingent liability is:

- a possible obligation that arises from past events, whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not totally controlled by the Group's entities;
- a present obligation resulting from past events, but not recognized in the balance sheet, as it is not probable that the outflow of cash or other assets in order to settle the obligation is necessary, or the obligation amount cannot be measured with sufficient reliability.

Granted credit lines and guarantees are the most significant items of granted off-balance sheet liabilities.

Customers' undrawn credit lines granted by the Group and liabilities under guarantees issued by the Group to customers are recognized in off-balance sheet liabilities in the amount resulting from contracts.

Provisions for estimated risk, related to the granted off-balance sheet liabilities, are reported in 'Provisions' in the Group's balance sheet. Credit risk arising from off-balance sheet liabilities is assessed on the basis of IAS 37 and IAS 39.

### 3.23. Company Social Benefit Fund

Company Social Benefit Fund ('CSBF') is created on the basis of write-downs made by the Bank and the Group's companies and charged to operating expenses as required by the CSBF Act of 04.03.1994 (Journal of Laws of 1994, No. 43, item 163, as amended; 'CSBF Act'). The objective of the Fund is to finance social benefits for employees. The Fund's liabilities are accumulated write-downs made by the Bank and the Group's companies for CSBF less non-returnable expenditure from CSBF. The Group has no social assets; all CSBF liabilities are expressed in cash deposited in a separate banking account.

For the purpose of the presentation in these financial statements, the Group set off assets and liabilities of CSBF, as they do not constitute the Group's assets nor liabilities.

### 3.24. Net interest income

Interest income and expense generated by financial assets and liabilities are recognized in the income statement at amortized cost using the effective interest rate method.

The following financial assets and liabilities are measured by the Group at amortized cost, by using the effective interest rate method:

- loans and receivables;
- held-to-maturity investments;
- financial liabilities other than measured at fair value through profit or loss;
- repurchase transactions.

In addition, in the case of debt securities carried at fair value through profit or loss and available-for-sale assets, the coupon rates and acquired discounts or premiums are charged to the income statement also at amortized cost.

The effective interest rate is the rate that discounts the expected flow of future net cash payments to present net carrying amount during the period until maturity or by the time of the next market evaluation of a particular financial asset and liability, and its determination entails any due or cash payments as well as cash flows paid or received by the Group under the agreement on a given instrument, excluding future possible credit losses.

The method of settling coupon rates, commissions/fees and certain external costs connected with the financial instruments (with the effective interest rate method or the straight-line method) depends on the

nature of a given instrument. In the case of financial instruments with fixed cash flows schedules, the method of the effective interest rate is applied. In the case of instruments with undefined cash flows schedules, it is impossible to calculate the effective interest rate and commissions/fees are settled on the straight-line basis over time.

The method of recognizing particular types of commissions/fees in the income statement depends on the economic nature of a commission/fee.

The items included in the commissions/fees settled over time include, e.g. fees for a positive appraisal of a loan application, commissions for granting a credit, commissions for releasing a credit, fees for establishing additional collateral, fees paid to loans extension intermediaries. The above commissions and fees constitute an integral part of the return generated by a specific financial instrument. This category also includes fees and costs of changes in contractual terms, what modifies the value of the initial effective interest rate. Any significant amendment to the conditions of a given financial instrument in economic terms is connected with the expiry of the financial instrument of the previous type and creation of a new instrument with different characteristics. The fees that are collected in this category include, among others, fees for preparing an annex changing a future cash flows schedule, fees for restructuring loan agreements, fees for postponement of payment dates, etc. The above-mentioned types of fees are deferred and settled over time in the income statement applying the effective interest rate method or on a straight-line basis, depending on the type of a product.

In the case of assets for which evidence for impairment was identified, interest income is charged on the basis of *'net investment'* defined as the difference between the gross exposure value (having regard for unsettled commissions) and impairment loss, and presented in net interest income.

### **3.25. Net fee and commission income**

As stated above, fees and commissions (including insurance commissions), directly attributable to particular transactions, are deferred and amortized over time using the effective interest rate method. The Group recognizes them in net interest income.

However, fees and commissions not amortized using the effective interest rate, but settled over time with the straight-line method or recognized one-off, are reported in *'net fee and commission income'*. Income settled over time with the straight-line method includes commissions on revolving loans, overdraft facilities, credit cards, guarantee lines, as well as letters of credit lines. All fees for the activities in which the Bank provides services related to transfers, payments, the distribution of insurance products and shares of investment funds as well as other incidental fees, are recognized once.

### **3.26. Net trading income**

Net trading income comprises gains or losses on the disposal or a change in the fair value of financial assets and liabilities measured at fair value through profit or loss. This item also includes result on foreign exchange and interest on swaps as well as valuation write-downs of active derivatives due to credit risk.

### **3.27. Dividend income**

In the case of equity investments recognized in the balance sheet at historical cost, dividend income is recognized in the income statement at the time when the right to dividend is established. In the case of equity investments recognized in the balance sheet with the equity method, dividend income is already included in the measurement with the accrual concept, initially recognized in the measurement with the equity method.

### **3.28. Other operating income and expenses**

Other operating income and expenses include items not related directly to the Group's operations. These are in particular income and expenses on sales and liquidation of property, plant and equipment, received and paid indemnities, lease income, and income and expenses on other services.

Other operating income and expenses also include impairment losses on loans and advances to various debtors.

### **3.29. Taxation**

The deductions from profit before tax entail current income tax payable and deductions/credits associated with the change in deferred income tax.

Current tax for the period is calculated by the Group's companies on the basis of their profit before tax as per books adjusted with income and expense, which, under the present income tax act, are excluded from the tax base. Furthermore, the book profit before tax in the current year is adjusted to take account of the cash realization of income and expenses in the current reporting period, which are recognized in profit before tax in previous years. Deferred income tax recognized as an element of income tax charge/credit on book profit before tax is calculated as the net effect of the change in deferred tax assets and liabilities.

Details on the method of calculating deferred tax are presented in Note 3.18.

### **3.30. Comparable data**

Accounting principles adopted to prepare these financial statements are applied in a continuous manner in all presented periods, except for the presentation changes described in Note 5.

## **4. Accounting estimates**

The preparation of financial statements in line with the IFRS requires a professional judgment of the Bank's Management Board and Management Boards of the Group's companies on the adopted accounting principles and accounting estimates applied with respect to balance sheet items and income statement items. Estimates are made basing on historical data and a number of assumptions based on the facts available as at the balance sheet date, resulting from internal and external conditions. The actual results of future business operations may differ from the present accounting estimates as at the balance sheet date. Therefore, accounting estimates are verified on a regular basis. Changes in estimates are recognized in the financial statements in the period they were introduced. If such changes are also related to future periods, the assumptions being the basis for the estimates for future periods are also adjusted.

The most important accounting estimates prepared for the purpose of these consolidated financial statements refer to:

- identification and measurement of impairment losses for financial assets measured at cost or at amortized cost;
- measurement of financial assets and liabilities at fair value, including derivatives for which no active market exists;
- a value of deferred tax assets;
- provisions.

In the second quarter of 2012, the Bank implemented new models estimating the level of impairment losses for exposures assessed collectively. The said changes aimed at the better reflection of the level and specific nature of the risk for particular customer segments.

- Corporate Segment and SMEs (maintaining comprehensive bookkeeping)

The implemented models estimating the level of impairment losses, unlike the product-oriented approach applied so far, assume the customer-oriented approach. It results in the assignment of the most conservative risk parameters to a customer's total exposure: days of default and PD rating.

PD model: The customers from the non-impaired portfolio are divided into baskets comprising both the information about their PD rating and days of default. Expected probabilities of the impairment in the Loss Identification Period (LIP) are determined on that basis. In the previous methodology, the baskets comprised only information about days of default. The PD model is implemented separately for the Corporate Segment and for SMEs (maintaining comprehensive bookkeeping).

LGD model: The model allows for the calculation of expected future recoveries from the exposures in the impaired portfolio on the basis of historical cash flows. Accumulated recoveries in breakdown into months after the occurrence of impairment are determined. Unlike in the PD model, the recovery ratios are calculated collectively for the customers from the Corporate Segment and SMEs (maintaining comprehensive bookkeeping).

- Retail Segment (except for the exposures granted via the sales network of Żagiel).

PD model: Implemented models are based on the architecture of the rating system, which is applied to assess the credit risk upon the extension of loans and to assess the parameters complying with the foundation internal-ratings based (FIRB) approach. The application of scoring models, which are the basis for the rating system, allows for more precise quantification of the risk than in the segmentation based on past due days applied so far, and directly links the amount of the impairment loss to the most important criterion (rating) on the basis of which the Bank makes the decision concerning the extension of a loan.

LGD model: The model allows for the calculation of expected future recoveries from the exposures in the impaired portfolio on the basis of historical cash flows. Accumulated recoveries in breakdown into months after the occurrence of impairment are determined.

- Retail Segment (exposures granted via Żagiel).

PD/LGD model: The models assessing the impairment loss for customers assessed collectively are based on the properties of the so-called Markov chains. The portfolio is divided into three categories of homogenous states: accounts without default, accounts in default prior to the termination of the agreement and accounts terminated (the division based on the months after the termination of the agreement).

The application of the segmentation described above allows for more precise quantification of the risk than in the segmentation applied so far based only on past due days, and links the amount of the impairment loss with the life cycle of a loan product. In addition, due to the specific structure of the model, PD/LGD parameters can be determined simultaneously.

In order to verify the pertinence of obtained parameters, the said models are tested on a monthly or quarterly basis through related back-test procedures.

The estimated positive impact of the said change in the methodology upon the Group's profit before tax as at the date of its implementation amounted to PLN 64,355 thousand and was presented in 'Net impairment losses on financial assets, other assets and provisions'. Determining the impact of this change on the results of 2012 and 2011, with technical and financial reasons, is impracticable.

The Management Board of Bank Zachodni WBK S.A., after the merger with Kredyt Bank S.A., reviewed the judgment related to the impairment of individually significant credit exposures with evidence of impairment as of 31.12.2012. Effective from the review, the level of impairment and provisions for off-balance sheet items were calculated based on new scenarios for loan recovery (weighted with the probability of their realisation) and significantly higher discount factors for collaterals. Also new circumstances were taken into account that emerged after the balance sheet date and affected the previous estimations. As a result, the total adjustment to the level of impairment, provisions for off-balance sheet items and accrued interest for individually significant exposures amounted to PLN 319 million (of which PLN 28.6 million related to interests and adjusted Interest income line).

Key evidence that influenced the review of the valuation, for the four most significant credit exposures include:

Debtor 1 and 2 from construction sector: total adjustment to the impairment in the amount of PLN 116 million

- Significant decrease in value of assets taken as collateral resulting from deterioration of the situation in road construction sector, as a consequence of the increase supply of the raw materials. Over the recent period of time in Poland new investments have been made to expand existing and built completely new stone mines for extraction of stone aggregate, therefore total production capacity seem to be excessive in comparison to maximum demand, that has been observed in Poland in the period 2009 to 2011. Meanwhile, since the beginning of 2012 the demand has dropped dramatically;
- A decrease of forecasted financial surplus to be generated for the purpose of debt servicing for the debtors;
- Additional legal disputes have emerged in the conducted insolvency proceedings for debtors, that will limit the available financial resources that may be used for debt repayment to the Bank;
- For the purpose of the estimation of the impairment allowance two scenarios have been accepted: restructuring and liquidation;
- Under liquidation scenario the value of collaterals compared to the external valuation has been adjusted by the ratio of 0.3, that according to the Group is reflecting the situation at the market for such assets and internal valuation of those assets;
- Under restructuring scenario discounted cash flows from operating activity over the period of 10 years for the repayment schedule for principal and interest have been accepted.

Debtor 3 from property sector: total adjustment to the impairment and accrued interest in the total amount of PLN 45 million

- A decrease of value of assets accepted as collaterals reflecting a new updated valuation and also accounting for the evidence of a decrease of the current market rates for rental of commercial property, comparing to those contracted in the existing agreements with tenants, also reflecting the rights recently acquired by tenants to early terminate the rental contracts, as the result of the company being put under liquidation insolvency status;
- Termination of the rental contract by one major tenant;
- Increased probability assessment for the legal dispute to emerge with other creditors of that customer, that might limit the ability of the Bank to utilise collaterals or significant deferral in the timing of the execution of the allocation plan for the bankruptcy assets;
- For the purpose of the estimation of the impairment allowance only bankruptcy scenario has been accepted with the two sub scenarios: (a) forced sale of assets at the level of 0.67 of external valuation over the period of 2 years and partial requirement to repay other creditors from the bankruptcy assets, (b) sale of assets at the price of 0.85 of external valuation.

Debtor 4 from metallurgy sector: total adjustment to the impairment in the amount of PLN 30 million

- On the basis of 2012 results the following facts were identified: lack of meeting the financial forecast and breach of covenants for minimum financial ratios included in the loan agreement;
- Lack of payment of commission for the Bank in the month of December 2012 and simultaneously a notification on the lack of financial capacity to service interest and principal of the debt;
- Increase of leverage ratio compared to financial surplus significantly above the acceptable level at the market and the industry average;

- Loss generated as a result of decreased market share and lower steel prices resulting from re-exporting of products without VAT;
- For the purpose of the calculation of the impairment allowance 3 scenarios have been accepted: (a) liquidation, (b) restructuring - balanced, (c) restructuring - optimistic;
- The adjusting ratio for the value of collaterals has been decreased from 0.7 to 0.3 considering lack of liquidity for the specialist equipment requiring high capital expenditures and large storage space;
- Under restructuring scenarios there is an assumption about partial conversion of debt into shares and partial redemption of the debt covered by restructuring scenario that resulted in the lower net present value of the expected operating cash flows.

Moreover, the Management Board of Bank Zachodni WBK S.A. after the merger with Kredyt Bank S.A. has performed an analysis of the impairment allowance for the retail and SME credit exposures calculated on the portfolio basis that were included in the balance sheet of Kredyt Bank S.A. for both non-impaired portfolio and portfolio of receivables with evidence for impairment. As a result of the performed analysis changes have been introduced to the existing approach for calculation of parameters, in particular for length of the period considered for historical data used for LGD determination, and also for selected IBNR portfolios introducing adjustments to the values of PD and LIP.

Resulting from the above changes the impairment allowance for portfolio calculated loans has been increased by the amount of PLN 258 million that can be broken down as follows:

<b>Type of exposure (in PLN million)</b>	<b>Impairment losses IBNR</b>	<b>Impairment losses for receivables with evidence for impairment</b>	<b>Total</b>
Mortgage housing loans and other mortgage loans	34.3	142.9	177.2
Cash loans	7.3	26.4	33.7
Credit cards	3.7	4.1	7.8
Overdraft facilities	3.5	3.9	7.4
Other loans	9.3	22.5	31.8
<b>Total</b>	<b>58.1</b>	<b>199.8</b>	<b>257.9</b>

Group has disclosed the impairment allowance for portfolio calculated loans as presented in the table above as a liability in the line item Provisions in correspondence with the line item Net impairment losses on financial assets, other assets and provisions in the consolidated profit and loss statement.

Furthermore, the level of provision for litigations has been increased by the amount of PLN 22.5 million.

Apart from the described above issues the Group did not introduce any other material changes in the applied methods of performing accounting estimates as compared to the principles and methods described in the Group's published consolidated financial statements as of 31.12.2011.

#### **4.1. Valuation of financial assets and liabilities at fair value**

Fair value is an amount for which an asset may be sold or exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

The transaction price is the best indicator of fair value at the initial recognition of a financial instrument.

Fair value of financial assets and liabilities is determined on the basis of quotations on active markets, including prices of the latest transactions.

In the case of financial assets and liabilities recognized in the balance sheet at fair value (except for equity instruments from the portfolio of available-for-sale assets), for which no active market is identified

and there is no possibility of determining the fair value using market prices, they are measured on the basis of generally adopted measurement models based on variables that can be observed in the market environment.

The fair value of such financial assets and liabilities is determined on the basis of the net present value, i.e. the sum of all cash flows discounted using the yield curve applicable to a given currency and adjusted with the issuer's credit risk.

Certain variables, e.g. future interest rates, volatility parameters, correlations, must be assessed professionally. The models and variables are verified on a regular basis. The change in adopted models or variables in these models might affect accounting estimates related to measurement.

Financial instruments measured at fair value are classified according to a three-level hierarchy of fair value:

- Level 1 comprises financial instruments quoted in an active market, whose measurement at fair value is determined on the basis of present and readily available market prices.
- Financial instruments presented at Level 2 are not quoted in an active market, but the inputs used to measure the fair value are based on observable market inputs.
- Level 3 comprises financial instruments that are not quoted in an active market, and their measurement at fair value is not based on observable market inputs.

#### **4.2. Impairment of financial assets valued at cost or at amortized cost**

At each balance sheet date (at least once per quarter), the Group analyzes whether there is an objective indication that a financial asset and/or a group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence for impairment as a result of one or more events that occurred after initial recognition of the asset and that loss event or events has an impact on the estimated future cash flows generated by the financial asset or the group of financial assets, assuming that reliable estimation is possible. Expected future losses are not taken into account in estimates of impairment.

If the Group identifies an evidence for impairment, the amount of the impairment loss is determined as the difference between the carrying amount of a loan and its economic value measured as the present value of estimated future cash flows discounted using the initial effective interest rate of contracts. Impairment loss is recognized in the income statement in correspondence with provision account which adjusts assets' value.

Loan receivables constitute the most significant class of financial assets recognized in the Group's balance sheet at amortized cost and subject to impairment.

##### **4.2.1. Evidence for impairment**

The analysis of the evidence indicating the risk of impairment is performed for individual loans as well as portfolios (groups) of loans.

A list of objective evidence includes:

- a) significant financial problems of an issuer or a debtor;
- b) a breach of contract, e.g. failure to pay or delaying payment of interest or the principal amount;
- c) granting a facility by the lender to the borrower, for economic or legal reasons related to the borrower's financial problems, where such a facility would not have been granted otherwise;
- d) high probability of the borrower's bankruptcy or their another financial reorganization;
- e) in the case of cash loans, exceeding specific factors used in the credit risk assessment process of all customers.

If there is no evidence that the impairment occurred, the previously recognized impairment losses are reversed through income statement.

#### **4.2.2. Measurement of individual impairment**

Individual impairment is measured for loan receivables over a specific exposure level, for which certain individual evidence indicating impairment was identified. The process of estimating future, expected cash flows is carried out in a specially dedicated IT tool.

Expected future cash flows from collateral are estimated on the basis of debt recovery value which is calculated with the application of periodically verified adjusting indicators determined for each type of collateral on the basis of historical data collected by the Group concerning the duration of the debt collection process, recovered amounts from collateral and their value determined in the valuation.

#### **4.2.3. Measurement of collective impairment**

A collective analysis is conducted in the following cases:

- In the event where, regardless of the exposure value, no objective evidence for loan impairment occurred, such exposure is included in the credit portfolio of similar nature and the collective analysis of the impairment is conducted.
- In the event of objective evidence for the impairment of an asset which is not individually significant (below the defined exposure level).

Homogenous loans portfolios are created basing upon similar characteristics of credit risks that are specific for the defined groups of customers and products. The collective impairment is measured basing on historical parameters of losses generated by similar assets portfolios. Historical trends for losses are cleared of one-off events and are updated against a current risk profile of homogenous groups of assets. Hence, the portfolios systematic risk is identified. The following issues, apart from corrected historical trends, have a material impact on the level of the collective impairment:

- fluctuations in the receivables portfolios;
- the Group's operating effectiveness in credit risk management processes, particularly taking into account the restructuring and debt collecting activities;
- a macroeconomic situation.

#### **4.3. Impairment of financial assets available-for-sale**

Objective evidence of impairment for an investment in an equity instrument includes information about significant changes with an adverse effect that have taken place in the technological, market, economic or legal environment in which the issuer operates, and indicates that the cost of the investment in the equity instrument may not be recovered. A significant or prolonged decline in the fair value of an investment in an equity instrument below its cost is also objective evidence of impairment.

If the Group identifies objective evidence for the impairment of an asset classified as available for sale, the cumulative negative measurement of this asset, previously accounted for in the revaluation reserve, is written off and recognized directly in the income statement, despite the fact that this asset is not excluded from the balance sheet.

In the case of an equity instrument classified as available for sale for which fair value cannot be determined reliably, i.e. measured at historical cost having regard for impairment, impairment losses are not reversed. In the case of a debt instrument measured at fair value at the time when the circumstances indicating impairment are no longer identified, the amount of the reversed impairment loss is recognized in the income statement.

#### 4.4. The values of deferred tax assets

The probability of realizing net deferred tax asset is determined on the basis of financial plans and tax forecasts prepared by the Bank's Management Board, updated on an ongoing basis as at the end of each quarter.

The companies of the Group recognize a deferred tax liability for all temporary differences whereas the deferred tax asset is recognized up to the amount justified by financial plans approved by the Management Boards of these companies concerning the probable realization of the asset.

#### 5. Comparable data

The comparable data for previous periods included in these financial statements take account of the following presentation changes as regards the data presented in the consolidated financial statements prepared as at 31.12.2011.

In 2012 the Group changed the presentation of expenses incurred by the Group within particular expense categories from net terms to gross terms (including VAT). The intention was more transparent presentation of expenses. Therefore the values of the items presented in the consolidated income statement for 2011 have changed.

	Published data	Changes	Comparable data
<i>in PLN '000'</i>	01.01.2011- 31.12.2011		01.01.2011- 31.12.2011
General and administrative expenses	-999 500	9 137	-990 363
Other operating expenses	-54 035	- 9 137	-63 172

Below, we present notes showing the changes in the presentation of particular items of 'General and administrative expenses' and 'Other operating expenses' for 2011 (in additional notes, unlike in the income statement, the expenses are stated with '+').

<b>General and administrative expenses</b>	<b>Published data</b>	<b>Changes</b>	<b>Comparable data</b>
<i>in PLN '000'</i>	<b>01.01.2011- 31.12.2011</b>		<b>01.01.2011- 31.12.2011</b>

## 6. Segment reporting

The criterion for separating a segment entails the method of carrying business and the type and scope of information used by the management in a given entity. An operating segment is a type of activities reviewed regularly by the authorities responsible for making operating decisions, including decisions concerning the method of allocating resources within the reviewed segment. The figures originate from internal reports used by the Bank's management to review the results of the activities of a given segment. The presentation of particular items follows the approach applied in management reporting. At the same time, one should notice that the management segmentation differs from the financial reporting segmentation applied in the remaining parts of the financial statements.

The Group's operating activities were divided into three basic segments: retail, corporate, treasury.

The Group's operations were not diversified in geographical terms. Operations were focused on the Polish market; the main customer base was composed of national natural and legal persons and foreign customers operating on the Polish market.

### Retail Segment

Retail Segment, in management terms, incorporates products targeted at individual customers, private banking, as well as micro and small enterprises (SME), whose annual sales revenue does not exceed PLN 1 million.

The offer entailed a wide choice of deposit, credit and insurance (bancassurance) products offered in cooperation with TUnŻ WARTA S.A. and TUiR WARTA S.A., and investment products offered by KBC TFI S.A. This offer was addressed to customers through traditional channels of distribution via the Bank's nationwide network of branches and affiliates, KB24 online service as well as creditonline service, and intermediaries operating in the market.

### Corporate Segment

Corporate Segment, in management terms, entails transactions with medium-sized companies (SME with annual sales revenue exceeding PLN 1 million, but not exceeding PLN 25 million), large companies (with total sales revenue exceeding PLN 25 million) as well as state budgetary units at central and local levels.

Beside the traditional products, such as loans, deposits, settlement services, derivatives, the customers from this segment were offered specialist services. They were tailored to customers' individual needs, e.g. organizing syndicates supporting investment projects, financing real estate transactions, financing foreign trade and bulk payments. The Bank's offer in this segment was expanded by the products of Kredyt Lease S.A., which offered a complete range of services for companies in respect of leasing of property, plant and equipment.

### Treasury Segment

Treasury Segment, in management terms, comprises the result of the transactions performed by the Bank on its own account as an active participant in the money market (Treasury and NBP bills), bonds market (Treasury and commercial bonds), currency market and interbank market. The result of the segment also includes net income on derivative instruments transactions: forward, FX swap, IRS, CIRS, FRA, as well as interest rate, currency, discounted and commodity options, except for write-downs for credit risk. Besides the trading activities carried by the Bank on its own account, the segment was responsible for the activities aiming to hedge the Banking Book position.

### Other

Income and expenses not assigned to above segments have been presented as 'Other' segment. In addition, this category comprises the results of the operations of Kredyt Trade Sp. z o.o. w likwidacji and Reliz Sp. z o.o. (until the deconsolidation date).

Respective consolidation eliminations were made for the presentation of the results of particular segments.

### **Additional clarifications**

The results presented in all segments include the costs of the financing of lending activities and interest income on the sales of deposit resources in internal transactions and they result from the application of an internal price (transfer rate) determined on the basis of reference rates (money market rates) for particular deposit and credit products.

The reconciliation of particular balance sheet items and income statement items for reporting segments with the items of the consolidated balance sheet and the items of the consolidated income statement must encompass the adjustments presented further in this Note.

Net interest income includes mainly net interest income from deposit and lending activities and the total net income from loan commissions treated, in management terms, as an element of interest margin. The Bank's Management Board, when making operating decisions, bases them mainly on the interest margin. In addition, particular segments entail the costs of financing the cash maintained in the Bank's branches.

Net commission income and other net income comprises:

- commissions for keeping accounts and transactions;
- commissions related to credit, debit and other cards;
- commissions related to the distribution of the shares of the societies of investment funds and other services provided to societies of investment funds;
- commissions related to insurance products;
- commissions related to foreign transactions, i.e. export and import payment orders, transfers and guarantees, letters of credit, bill guarantees and cash collections;
- other net income entailing net income from other commissions and net income from other operating income and expenses.

Net income from treasury transactions in the Retail Segment and in the Corporate Segment is the net income from exchange operations and net income from financial transactions which are a margin on such products as repurchase transactions, bonds, IRS and FX options.

Net income from treasury transactions is composed of the following items of the consolidated financial statements:

- net trading income (except for, e.g. net increase/decrease in the provisions for potential losses related to open/active derivatives and the valuation of embedded instruments related to the enterprises function) and
- net result on derivatives used as hedging instruments and hedged items.

Net gains from investment activities – the presented item is the sum of the following items from the financial statements: 'Net gains from investment activities' and 'Dividend income'.

In management reporting, the item 'Net impairment losses on financial assets, other assets and provisions' includes an additional provision for potential losses related to open/active derivatives (presented in these consolidated financial statements in net trading income).

Group's general and administrative expenses – since the beginning of 2012, the Group has been allocating general and administrative expenses in line with the Activity-based Costing (ABC) system; the comparable data have been restated according to it as well.

The assets of the segment were divided into four basic categories:

- Loans and advances to banks – include net loans and advances to banks, excluding interest receivables, as well as debt securities issued by other banks and classified as loans and receivables. The category is presented in the treasury segment.
- Loans and advances to customers – include net loans and advances to customers (including leasing fees), excluding interest receivables, as well as debt securities classified as loans and receivables.

- Securities – this category is presented in the treasury segment, entails debt securities, securities with the right to equity and shares in investment funds, excluding debt securities classified as loans and receivables.
- Other – this category entails all other assets not presented above.

Total equity and liabilities are presented in five lines:

- Amounts due to customers – customers' deposits, except for interest liabilities.
- Interbank deposits – amounts due to the National Bank of Poland, except for the lombard loan and repos as well as current and term amounts due to banks.
- Borrowed loans and advances – the lombard loans and borrowed loans and advances.
- Subordinated liabilities – subordinated liabilities, except for interest, both included in and excluded from own funds.
- Other liabilities and total equity.

Interest income comprises, e.g. cash interest and interest calculated on an accrual basis on receivables for which evidence for impairment was identified. Interest calculated on an accrual basis was calculated with the effective interest rate applied in discounting expected cash flows for the purpose of estimating the impairment loss on loan receivables. The interest on the loans and advances with evidence for impairment as at 31.12.2012 amounted to PLN 48,366 thousand, and as at 31.12.2011 to PLN 40,975 thousand. Accrued interest was taken into consideration when estimating impairment losses on such receivables.

### Operating lease rental

Leasing contracts under which the lessor retains the whole risk and all rewards arising from the possession of the leased property, are accounted for as an operating lease. Fees under operating lease are recognized as expenses in the income statement on a straight-line basis over the period of leasing.

Contracts of operating lease under which the parent company acted as the lessee were mainly related to the lease of real estate and movables used by the parent company in the normal course of business. All contracts were executed on market terms, without any exceptional or non-standard terms or conditions.

Net leasing payments paid by the Group and recognized in particular reporting periods as general expenses were as follows:

<i>in PLN '000'</i>	01.01.2012- 31.12.2012	01.01.2011- 31.12.2011
Leasing payments	123 584	117 368

The majority of fees were the fees for the leasing of real estates.

The total amount of future minimum gross leasing fees that the Group is obliged to pay under irrevocable contracts of operating leasing, determined as at the balance sheet date, is as follows:

<i>in PLN '000'</i>	31.12.2012	31.12.2011
<b>Future minimum gross lease payments (with VAT)</b>		
- not later than 1 year	106 375	108 597
- later than 1 year and not later than 5 years	191 499	194 963
- over 5 years	25 312	14 764
<b>Total</b>	<b>323 186</b>	<b>318 324</b>

Under operating leasing contracts, the parent company operates two Head Office buildings, which, towards the end of 2004, were sold to companies not related to the Bank and are now leased from them. The sale transactions were executed on market terms. Contracts of lease are also executed on market terms. The contracts do not meet the criteria of financial leasing and, therefore, are classified as operating leasing contracts.

### 18. Other operating expenses

<i>in PLN '000'</i>	01.01.2012- 31.12.2012	01.01.2011- 31.12.2011 comparable data

<b>Equity securities</b>	11 127	18 259
<b>Total</b>	<b>60 413</b>	<b>100 684</b>

All investment securities classified upon initial recognition to the portfolio of financial assets at fair value through profit or loss were measured at fair value on the basis of market quotations, except for SINUSD commercial bonds and equity investments.

For equity investments, the Group developed a valuation model based, inter alia, on the data originating from the active market.

\* figures as at 31.12.2011 do not take account of the data concerning embedded instruments; the item 'Liabilities related to the sale/purchase transactions' in Note 49 comprises in addition current currency exchange transactions and transactions on securities

**30. Financial assets subject to hedge accounting**

As at 31.12.2012 and 31.12.2011, the Group applied loans-related cash flow hedge using IRS's, the aim of which was to change floating interest rate cash flows generated by the loans portfolio to cash flows based on a fixed interest rate to match the structure of the interest rate risk for assets and liabilities based on a fixed interest rate. The hedge involved swap transactions in which the Group, on the whole, paid cash flows based on a variable WIBOR 3M and EURIBOR 3M interest rate matched to the interest rate of the loans portfolio, and received interest flows at a fixed interest rate with required maturity. The above structure made it possible to change the floating interest rate into the fixed interest rate without the necessity for employing additional liquid cash for the purchase of new assets (e.g. fixed coupon bonds), at the same time ensuring a stable impact on the result by recognizing changes in fair value of swaps in the Bank's equity.

As at 31.12.2012, the Group applied cash flow hedge related to loans and deposits using CIRS's, the aim of which was to hedge the interest rate risk and the currency risk. The hedge involved swap transactions in which the Group paid cash flows in CHF and interest based on LIBOR 3M rate, and received cash flows in PLN and interest based on WIBOR 3M rate.

As at 31.12.2012 and 31.12.2011, the Group did not apply hedge accounting to hedge fair value of financial assets.

The rules of recognizing and measuring the effectiveness of the hedges for transactions subject to hedge accounting are described in Note 3.7.6 of these financial statements.

**As at 31.12.2012****Financial assets subject to cash flow hedge accounting**

- loans portfolio

Hedged assets – mortgage loans of PLN 1,696,764 thousand.

\*\*\* comprises mainly investment loans and working capital loans

\*\*\*\* comprises mortgage loans other than for housing purposes and refinancing loans secured with mortgages

The amount of non-amortized loan commissions settled with the effective interest rate method, which, according to the concept of the measurement of financial assets at amortized cost, decreases the value of gross receivables, amounted to PLN 62,891 thousand as at 31.12.2012, and PLN 80,502 thousand as at 31.12.2011. The amounts have been recognized in total gross loans and advances.

### **Receivables assessed individually**

<i>in PLN '000'</i>	<b>31.12.2012</b>	<b>31.12.2011</b>
Gross receivables	1 394 192	975 268
Impairment losses	606 570	432 592
Net receivables	787 622	542 676

### **Accepted loan collateral**

In the case of receivables assessed individually, the total fair value of collateral approved by the Group considered in estimated future cash flows is presented in the table below.

<i>in PLN '000'</i>	<b>31.12.2012</b>	<b>31.12.2011</b>
Value of accepted collateral for loans and advances assessed individually	838 684	499 995

Apart from standard loan collateral specified in loan agreements which are in line with the practices applied in the industry (mortgage, transfers of ownership to secure a loan, registered pledges, frozen cash on bank accounts, sureties, guarantees and transfers of receivables), the Group did not apply any other loan collateral, e.g. credit derivatives.

The Group assessed established legal securities of loan transactions by an analysis of the value of approved collateral on the basis of documents lodged by the borrower and internal databases including historic data about the recoverability of collateral.

From the point of view of the Bank's loans portfolio, mortgages that significantly reduce the credit risk were the most important collateral. The Bank constantly monitored the value of approved mortgage collateral, e.g. by analyzing LtV (Loan-to-Value) ratios. As at 31.12.2012, the fair value of approved mortgage collateral for housing purposes mortgages and other mortgage loans, which affects the assessment of the credit risk, amounted to PLN 15,763 million, and as at 31.12.2011 it amounted to PLN 15,149 million.

All investment securities classified in the portfolio of available-for-sale financial assets were measured at fair value on the basis of market quotations, except for SINPLN commercial bonds, Treasury Eurobonds, money bills of the National Bank of Poland and non-listed equity investments.

The fair value of SINPLN bonds was determined by discounting cash flows from the bonds with PLN-BOND curve having regard for the credit spread. The bonds were with fixed coupon.

Treasury Eurobonds were valued by discounting cash flows from the bonds with EUR-BOND curve (for securities in EUR), having regard for the credit spread.

The money bills of the National Bank of Poland were valued with the application of PLN-SWAP curve, disregarding the credit spread.

### 38. Investment properties

The table below presents changes in investment properties in 2012 and in 2011:

<i>in PLN '000'</i>	<b>01.01.2012- 31.12.2012</b>	<b>01.01.2011- 31.12.2011</b>
<b>Gross value as at the beginning of the period</b>	<b>299 963</b>	<b>320 933</b>
Increases	80	2 228
Decreases*	280 512	23 198
<b>Gross value as at the end of the period</b>	<b>19 531</b>	<b>299 963</b>
<b>Depreciation as at the beginning of the period</b>	<b>89 037</b>	<b>91 513</b>
<b>Changes in depreciation</b>	<b>-86 796</b>	<b>-2 476</b>
Depreciation	4 974	7 718
Decreases*	91 770	10 194
<b>Depreciation as at the end of the period</b>	<b>2 241</b>	<b>89 037</b>
<b>Impairment as at the beginning of the period</b>	<b>1 861</b>	<b>3 752</b>
Increases	32	0
Decreases	740	1 891
<b>Impairment as at the end of the period</b>	<b>1 153</b>	<b>1 861</b>
<b>Net value as at the beginning of the period</b>	<b>209 065</b>	<b>225 668</b>
<b>Carrying amount as at the end of the period</b>	<b>16 137</b>	<b>209 065</b>

\* changes in 2012 related mainly to the deconsolidation of Reliz described in Note 1

In 2012, income from rent related to the investment properties amounted to PLN 21,571 thousand. The direct operating expenses related to the investment properties and incurred in the period amounted to PLN 9,044 thousand. The decrease in income and expenses as compared to 2011 is related to the deconsolidation of Reliz described in Note 1.

In 2011, income from rent related to the investment properties amounted to PLN 33,177 thousand. The direct operating expenses related to the investment properties and incurred in the period amounted to PLN 13,402 thousand.

The investment properties comprised mainly buildings, which were depreciated on a straight-line basis (the annual depreciation rate was 2.5%). Other plant and machinery, which formed an integral part of investment properties were depreciated at the rates ranging from 7% to 30%.

### 39. Non-current assets held for sale

<i>in PLN '000'</i>	<b>31.12.2012</b>	<b>31.12.2011</b>
<b>Fixed assets held for sale</b>	<b>5 709</b>	<b>12 128</b>
Gross fixed assets	5 709	13 573
Impairment losses	0	1 445
<b>Total</b>	<b>5 709</b>	<b>12 128</b>

Non-current assets classified as held for sale are available for immediate sale. They are actively marketed for sale on market terms, without any exceptional or non-standard conditions, at a selling price reasonable in relation to their present fair value. The Group expects that the sale will be recognized as sale made within one year from the date of the reclassification of such assets to the category of non-current assets held for sale.

<b>Total</b>	<b>358 764</b>	<b>116 402</b>

\* provision for credit risk is described in Note 4

On 29.12.2011, the Bank's Management Board decided to create a provision in the amount of PLN 35 million for the potential liability related to the resale of Żagiel S.A. by KBC Group, for the price lower than the price obtained by Kredyt Bank S.A.

According to the agreement concluded on 16.12.2009 between Kredyt Bank S.A. and KBC Bank NV, the sale price for 100% of the shares of Żagiel S.A. amounted to PLN 350 million. The said agreement provided that the risk of Kredyt Bank S.A. would be limited to 10% of the sale price, i.e. PLN 35 million, if KBC sold the shares of Żagiel to an outside entity for the price lower than PLN 350 million. Due to the execution by KBC Bank NV of the sale of 100% of the shares of Żagiel S.A. to Santander Consumer Finance S.A. for the price of PLN 10 million, on 31.07.2012, the Bank received a call to pay PLN 35 million to KBC Bank NV. Due to the establishment in December 2011 of a provision for the said obligation, its satisfaction did not affect the income statement of the Group in 2012.

The litigations with the highest value claims are described in Note 69.

'Employee benefits provisions' are composed of provisions for retirement benefits.

## 48. Equity

### Share capital

As at 31.12.2012, the parent company's share capital totaled PLN 1,358,294,400 and was divided into 271,658,880 shares of nominal value of PLN 5.00 each. The parent company's shares were registered shares and bearer shares, but not preference shares. Each share entitled its holder to one vote at the parent company's General Meeting of Shareholders. The parent company's shares were admitted to public trading on the main market of the Warsaw Stock Exchange. As described in Note 2.2, on 02.01.2013, the trade in the Bank's shares was suspended until the date of their exclusion from the stock exchange trading. The share capital did not change in 2012 and 2011.

Pursuant to the Resolution of the Management Board of the Warsaw Stock Exchange (WSE) of 24.08.2012 and the Resolutions of the Management Board of the National Depository for Securities of 31.08.2012, 425 ordinary bearer shares created as a result of the conversion of 425 F series registered shares of Kredyt Bank S.A. marked with code PLKRDTB00029 were assimilated with 271,593,016 ordinary bearer shares marked with code PLKRDTB00011. The shares subject to the assimilation were marked with code PLKRDTB00011.

The said shares were introduced by the Warsaw Stock Exchange, in an ordinary manner, to the stock exchange trading on the primary market on 31.08.2012.

On 31.08.2012:

- 1) 9,734 shares were marked with code PLKRDTB00029;
- 2) 271,593,441 shares were marked with code PLKRDTB00011.

The analysis of registered shares and bearer shares presented below was prepared as at 31.12.2012.

#### Registered shares

The parent company's shareholders held 65,439 registered shares, which accounted for 0.02% of the share capital. Below, we present the registered shares as at 31.12.2012.

Series	Number of shares
A, C, F	9 734
P	29 042
S1	26 663
<b>Total</b>	<b>65 439</b>

A, C and F series shares were admitted to stock exchange trading after meeting requirement of converting them into bearer shares, and P and S1 series shares were admitted to stock exchange trading after obtaining respective authorizations.

#### Bearer shares

The parent company's shareholders held 271,593,441 bearer shares, which accounted for 99.98% of the share capital. Originally, the number of bearer shares amounted to 264,204,350. In addition, as a result of the conversion of registered shares into bearer shares, as at 31.12.2012, there were 7,389,091 bearer shares. Below, we present the bearer shares as at 31.12.2012.

Bearer shares (original)		Converted registered shares into bearer shares	
Series	Number of shares	Series	Number of shares
B	2 500 000	A, C, F	2 904 981
D	100 000	P	3 660 640

<b>Total bearer shares</b>		<b>271 593 441</b>	

The table below presents the list of major shareholders of Kredyt Bank S.A. as at 31.12.2012.

Shareholder	Line of business	Number of shares and votes at GMS	Share in votes and in share capital (in %)
KBC Bank NV – party of KBC Group	Banking	217 327 103	80.00

On 26.01.2012, the Bank received a notice from Pioneer Pekao Investment Management S.A. ('PPIM') about the decline in its total commitment to 4.29% of the total votes at the General Meeting of Shareholders concerning the financial instruments included in the portfolios managed by PPIM. Pursuant to the said notice, the commitment of Pioneer Fundusz Inwestycyjny Otwarty decreased to 4.16% of the total votes at the General Meeting of Shareholders.

Further information about the said issue is available in the current report dated 26.01.2012.

On the date of making the entry to the National Court Register concerning the merger of Kredyt Bank S.A. and Bank Zachodni WBK S.A. i.e. 04.01.2013, the Bank ceased to be an autonomous business entity and was deleted from the National Court Register.

Further information concerning the said issue is presented in Note 1 and Note 61.

<b>Total</b>	<b>1 696 711</b>	<b>2 201 666</b>

Major items in 'contingent liabilities' related to the guarantees issued for customers were guarantees of good contracts performance and loan repayment guarantees. The Bank offered its customers guarantees as a standard loan product offer mainly for corporate customers. Commission income from guarantees granted were charged to fee and commission income in the income statement on a straight-line basis over the lifetime of the guarantee.

The Group treated guarantees granted and unconditional financing liabilities as an exposure with credit risk for the purpose of credit risk management. The assessment of risk under issued guarantees was an element of the credit risk assessment process resulting from other credit products held by particular customers, i.e. all credit facilities, including guarantees, granted to particular borrowers were at the same time analyzed for the occurrence of the impairment indicators and the required level of allowance for impairment.

As at 31.12.2012, the estimated provision for the guarantees granted and unconditional financing liabilities amounted to PLN 63 298 thousand; and as at 31.12.2011 it amounted to 40,809 thousand. This amount is presented in Note 45 as 'Provision for off-balance sheet items'.

## 50. Capital adequacy ratio

\*\* estimated on the basis of the Standardized Approach

As at 31.12.2012 and 31.12.2011, the exposure concentration limit, the large exposure limit and the capital concentration threshold were not exceeded in Kredyt Bank S.A.

The risk management process was strictly related to the capital management process. According to the industry standards, the amount of the internal capital was defined from the economic point of view. In consequence, the internal capital of Kredyt Bank S.A. was estimated by applying the internal capital model of KBC Group, which encompasses all material types of risk.

### 53. Fair value of financial assets and liabilities not recognized at fair value in the balance sheet

#### 53.1. Fair value

Fair value is an amount for which an asset may be sold or exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction.

The main categories of financial assets and liabilities not measured in the Group's balance sheet at fair value are assets or liabilities measured at amortized cost or historical cost:

- loans and advances granted as well as other own receivables not held for trading;
- held-to-maturity investments;
- available-for-sale financial assets recognized at cost, including equity investments;
- financial liabilities not held for trading.

The table below shows the carrying amount and estimated fair value of the Group's financial assets and liabilities not recognized in the Group's balance sheet at fair value.

**As at 31.12.2012 \*\*\*\*\***

**53.2. Loans and advances to banks and to customers**

As stated in the sections concerning the accounting principles adopted by the Group and the material accounting estimates, granted loans and advances and other own receivables not held for trading are measured at amortized cost with the effective interest rate method, having regard for impairment measured on the basis of future expected cash flows (including those generated upon the sales of loan collateral) discounted with the original effective interest rate.

Poland does not have an active market on which loans and receivables may be traded, therefore, it is not possible to reliably determine the market price of these assets. Estimates performed on the basis of the models of measurement relying on discounted expected cash flows of the principal and interest are the best reflection of the fair value. The discount rate is the market rate as at the balance sheet date plus credit margin offered on the market for particular loan facilities and specific customer groups/segments, and also taking into account appropriate for Group cost of liquidity and cost of capital. The expected cash flows take into account potential overpayment of capital based on historical prepayment rates.

Calculation of the fair value as at 31.12.2012 is based on the estimated market interest rates. Due to the extinction of the active market for housing mortgages in CHF and EUR in Poland in 2012 it was crucial to estimate the market interest rate for such loans. Market interest rates were established on the basis of LIBOR interbank market and IRS market and adjusted for the credit risk margin attributable to given currency, and also taking into account appropriate for Group cost of liquidity and cost of capital. The valuation was made using the discounted cash flows method with the interest rate curves which were determined in accordance with the description above. The estimated cash flows include potential overpayments of capital determined based on historical prepayments.

The calculation of the fair value as at 31.12.2011 is based on estimated market interest rates. Estimating the market rate for housing purposes mortgages in CHF was necessary in particular, due to the extinction of the market of such mortgages in Poland. The Bank estimated the market interest rate on the basis of, among others, the public market information and the cost of the potential financing in CHF.

Data as at 31.12.2011 have not been restated for comparability.

### **53.3. Held-to-maturity investments**

As stated in the section on the accounting principles adopted by the Group, held-to-maturity investments are measured at amortized cost with the effective interest rate methodology. The market prices of securities applied in the measurement of fair value, for both categories of assets, do not take into consideration any potential adjustments resulting from the limited liquidity of the market or transaction costs.

### **53.4. Financial liabilities not held for trading**

As stated in Note 42 and Note 44, the deposits made in current accounts and term deposits with balance sheet maturities of less than three months, for which it was estimated that their carrying amount is equal to their fair value, constitute the bulk of the deposits made by banks and of customer deposits. The term loans and deposits received from KBC Group were discounted at the market rate from the inter-bank market for the respective currency and maturity.

## **54. Assets pledged as collateral**

As at 31.12.2012, the following assets in the form of debt securities were collateral for the Group's own liabilities:

- Commercial bonds of the nominal value of PLN 179,000 thousand and of the carrying amount of PLN 180,295 thousand were collateral for the protection fund for guaranteed cash in the Banking Guarantee Fund and were deposited in the National Depository for Securities;
- Treasury bonds of the nominal value of PLN 1,480,000 thousand and of the carrying amount of PLN 1,607,067 thousand as security for the loan extended by the European Investment Bank.

As at 31.12.2011, the following assets in the form of debt securities were collateral for the Group's own liabilities:

- Commercial bonds of the nominal value of PLN 135,000 thousand and of the carrying amount of PLN 135,773 thousand were collateral for the protection fund for guaranteed cash in the Banking Guarantee Fund and were deposited in the National Depository for Securities;
- Treasury bonds of the nominal value of PLN 1,110,000 thousand and of the carrying amount of PLN 1,153,225 thousand as security for the loan extended by the European Investment Bank.

## 55. Related party transactions

In 2012 and in 2011, no significant non-standard transactions had place with related parties whose nature and terms were not related to current operations. All transactions were executed on market terms, without any exceptional or non-standard terms or conditions.

Transaction volumes as well as related income and expenses are presented below.

## 56. Disposal of subordinated companies

On 21.06.2012, Kredyt Trade Sp. z o.o., the Bank's subsidiary, signed the final agreement on the sale of its 30% stake in KBC TFI S.A. to KBC Asset Management NV and completed the transaction. The selling price for the 30% stake in KBC TFI S.A. was PLN 37.5 million. The net impact of the transaction upon the Group's result for 2012 amounted to PLN 11,535 thousand and was presented in the net gains from investment activities.

Further information about the said transaction is available in the current report dated 21.06.2012.

No subordinated companies were sold in 2011.

## 57. Changes in the Management Board and in the Supervisory Board of Kredyt Bank S.A. in 2012

In 2012, the composition of the Management Board of Kredyt Bank S.A. did not change and as at 31.12.2012 it was as follows:

Mr. Maciej Bardan	- President of the Management Board, CEO
Mr. Umberto Arts	- Vice President of the Management Board, Vice CEO
Mr. Mariusz Kaczmarek	- Vice President of the Management Board, Vice CEO

Mr. Zbigniew Kudaś	- Vice President of the Management Board, Vice CEO
Mr. Piotr Sztrauch	- Vice President of the Management Board, Vice CEO
Mr. Jerzy Śledziwski	- Vice President of the Management Board, Vice CEO

The Ordinary General Meeting of Shareholders of Kredyt Bank S.A. appointed, as of 25.05.2012, Mrs. Lidia Jabłonowska-Luba as a Member of the Bank's Supervisory Board.

In addition, the Chairman of the Supervisory Board of Kredyt Bank S.A. received Mr. Jarosław Parkot's resignation from his membership in the Supervisory Board as from 25.05.2012.

As at 31.12.2012, the Supervisory Board of Kredyt Bank S.A. was composed of:

Mr. Andrzej Witkowski	- Chairman of the Supervisory Board
Mr. Adam Noga	- Vice Chairman of the Supervisory Board
Mr. Ronny Delchambre	- Member of the Supervisory Board
Mrs. Lidia Jabłonowska-Luba	- Member of the Supervisory Board
Mr. Guy Libot	- Member of the Supervisory Board
Mr. Stefan Kawalec	- Member of the Supervisory Board
Mr. Marko Voljč	- Member of the Supervisory Board

The Management Board and the Supervisory Board of Kredyt Bank S.A. performed their functions until 04.01.2013.

Due to the Bank's merger with Bank Zachodni WBK S.A., the composition of the Management Board of the merged Bank as at the date of the approval of these consolidated financial statements was as follows:

Mr. Mateusz Morawiecki	- President of the Management Board

In 2012 and 2011, the Members of the Bank's Management Board and the Members of the Bank's Supervisory Board did not receive remuneration for performing their functions in subsidiaries.

All disclosures concerning paid remunerations of the Members of the Bank's Management Board and of the Members of the Bank's Supervisory Board are presented in this Note and no other material remuneration-related benefits for the Members of the Management Board and the Members of the Supervisory Board were paid in 2012 and 2011.

#### **59. Value of loans and advances granted to the Members of the Management Board and to the Members of the Supervisory Board of Kredyt Bank S.A. and its subsidiaries**

Transactions concluded with the Bank's Management Staff were executed within the standard product offer.

As at 31.12.2012, the value of loans and cash loans extended by the Bank to the Members of the Bank's Management Board and the Members of the Bank's Supervisory Board amounted to PLN 261 thousand. There were no past due receivables.

As at 31.12.2011, there were no receivables from the Members of the Bank's Management Board and the Members of the Bank's Supervisory Board.

The Members of the Management Board and the Members of the Supervisory Board did not receive any loans and advances in subsidiaries.

All disclosures concerning the Members of the Management Board and the Members of the Supervisory Board are presented in this Note and there is no other material information concerning loans and advances granted to the Members of the Management Boards and the Members of the Supervisory Boards in the Bank and in subsidiaries.

#### **60. Dividends paid and declared**

Due to the merger of Bank Zachodni WBK S.A. and Kredyt Bank S.A., merger issue shares allotted to the shareholders of Kredyt Bank will participate in the dividend on equal terms with all other shares of BZ WBK from 1 January 2012, i.e. in profits for the financial year ended 31 December 2012.

Pursuant to the Resolution of the Ordinary General Meeting of Shareholders of Kredyt Bank S.A. concerning the distribution of profit for 2011 adopted on 25.05.2012, the dividend for 2011 was not paid.

## 61. Significant events

### 61.1. The merger with Bank Zachodni WBK S.A.

On 27.02.2012, KBC Bank NV and Banco Santander S.A. signed an investment agreement in which the parties expressed their intention to merge Kredyt Bank S.A. and Bank Zachodni WBK S.A. ('BZ WBK S.A.'). On the same day, Kredyt Bank S.A., BZ WBK S.A., KBC Bank NV and Banco Santander S.A. signed an agreement on starting work to merge Kredyt Bank S.A. and BZ WBK S.A.

The Merger Plan agreed on and signed by Kredyt Bank S.A. and BZ WBK S.A. on 11.05.2012 provided that the merger would be carried out pursuant to Article 492 § 1 item 1 of the Code of Commercial Companies through the transfer of all the assets and liabilities of Kredyt Bank S.A., being the target entity, to BZ WBK S.A., being the surviving entity, with the simultaneous increase in the share capital of BZ WBK S.A. through the issue of up to 18,907,458 J series ordinary bearer shares in Bank Zachodni WBK S.A. with the nominal value of PLN 10.00 each, which were allocated by BZ WBK S.A. to all existing shareholders of Kredyt Bank S.A. As a result of the merger, these shareholders became the shareholders of BZ WBK S.A. on the date of the merger, i.e. on the date of the registration of the merger in the register relevant to the registered seat of Bank Zachodni WBK S.A.

The parties agreed that the exchange ratio of the shares of Kredyt Bank S.A. into the shares of Bank Zachodni WBK S.A. will be as follows: for 100 shares of Kredyt Bank, the shareholders of Kredyt Bank S.A. will be granted 6.96 Merger Issue Shares, i.e. for one share of Kredyt Bank S.A., 0.0696 shares of Bank Zachodni WBK S.A. will be allocated.

The merger depended on the following conditions which were met:

- obtaining the permit of the Polish Financial Supervision Authority to the merger;
- obtaining the permit of the Polish Financial Supervision Authority to the amendments to the statutes of BZ WBK S.A.;
- issuing by the European Commission of a decision declaring that the concentration of Kredyt Bank S.A. and Bank Zachodni WBK S.A. is in line with the common market;
- confirming by the Polish Financial Supervision Authority that both the form and content of BZ WBK S.A.'s information memorandum are equivalent to the information required to be included in a prospectus;
- the failure to object by the Polish Financial Supervision Authority to the acquisition by KBC Asset Management NV of the shares of KBC TFI S.A.;
- adopting by the Bank's General Meeting of Shareholders a resolution concerning the merger with BZ WBK S.A.;
- adopting by the General Meeting of Shareholders of BZ WBK S.A. a resolution concerning the merger with Kredyt Bank S.A.

In addition, if Article 25 clause 1 of the Banking Law applied, the exceeding by KBC Bank of the 10% limit of the votes at the General Meeting of Shareholders of BZ WBK depended on the issue by the Polish Financial Supervision Authority of a decision confirming the absence of grounds for an objection to the exceeding by KBC Bank of the 10% limit of the votes at the General Meeting of Shareholders of BZ WBK or the lapse of the statutory deadline for the delivery of the decision containing such an objection.

The Opinion of a certified auditor (KPMG Audyt Sp. z o.o.) issued on 20.06.2012 from the audit of the Merger Plan for BZ WBK S.A. and Kredyt Bank S.A. claims, among other things, that:

- the Merger Plan of BZ WBK S.A. with Kredyt Bank S.A. was prepared, in all material aspects, in an accurate and proper manner;
- the share exchange ratio was properly determined in all material aspects;

- the methods applied to determine the ratio of the exchange of the shares of Kredyt Bank S.A. for the shares of Bank Zachodni WBK S.A., as proposed in the Merger Plan, are justified;
- no special difficulties were identified as regards the valuation of the shares in the merging Banks.

The Polish Financial Supervision Authority, at the meeting held on 19.06.2012, found no reason to object to the planned, direct acquisition of the shares of KBC Towarzystwo Funduszy Inwestycyjnych S.A. by KBC Asset Management NV in the number resulting in exceeding the 50% limit of votes at the General Meeting of Shareholders.

On 28.06.2012, the Management Board of Kredyt Bank S.A., acting pursuant to Article 504 § 1 and 2 of the Code of Commercial Companies, in relation to Article 402[1] of the Code of Commercial Companies, issued the first notice concerning the merger of BZ WBK S.A. with Kredyt Bank S.A. At the same time, the Management Board of Kredyt Bank S.A. convened the Extraordinary General Meeting of Shareholders to adopt the resolution on the merger of Kredyt Bank S.A. with BZ WBK S.A.

The second notice about the planned merger was issued on 16.07.2012.

On 18.07.2012, the European Commission decided not to object to the acquisition of the control over Kredyt Bank S.A. by Banco Santander S.A., and accordingly also by Bank Zachodni WBK S.A., and declared that the planned acquisition of the control was compatible with the common market and with the Agreement on the European Economic Area.

On 30.07.2012, the Bank's Extraordinary General Meeting of Shareholders adopted the resolution concerning the merger with BZ WBK S.A.

On 04.12.2012, the Polish Financial Supervision Authority issued a decision granting consent to the Bank's merger with BZ WBK S.A.

Simultaneously, the Polish Financial Supervision Authority confirmed the absence of grounds for an objection to the planned direct acquisition by KBC Group NV, via KBC Bank NV, of such a number of shares of BZ WBK S.A. which would guarantee exceeding 10% of votes at the General Meeting of Shareholders; however, not resulting in exceeding 20% of votes at the General Meeting of Shareholders.

On 04.12.2012, the Polish Financial Supervision Authority issued a decision granting consent to amendments to the statutes of BZ WBK S.A. that were made in connection to the merger of BZ WBK S.A. with Kredyt Bank S.A.

On 06.12.2012, the Polish Financial Supervision Authority issued a decision confirming that both the form and content of the information included in the information memorandum of Bank Zachodni WBK S.A. prepared for the purpose of the merger of BZ WBK S.A. with the Bank were equivalent to the information required to be included in a prospectus.

From 02.01.2013 until the date of excluding such shares from the stock exchange trading, the trade in the Bank's shares marked with the code PLKRDTB00011 will have been suspended.

On 04.01.2013, the Bank was notified that, on 04.01.2013, the District Court for Wrocław-Fabryczna, VI Commercial Division of the National Court Register registered the merger of Bank Zachodni WBK S.A. with Kredyt Bank S.A. The merger was effected in accordance with Article 492 § 1 item 1 of the Code of Commercial Companies by way of the transfer of all assets of Kredyt Bank S.A. to BZ WBK S.A. (a merger through acquisition) in exchange for newly issued J series shares in BZ WBK S.A. that were allotted to all existing shareholders of Kredyt Bank S.A.

On the date of entering the merger in the court register, the Bank was merged with Bank Zachodni WBK S.A., and hence ceased to be a subsidiary of KBC Group and, as a merged bank, became a part of Santander Group.

The justification as well as the description of strategic reasons and economic benefits related to the merger of Bank Zachodni WBK S.A. and Kredyt Bank S.A. can be found in the Bank's Management Board's Report published along with the Merger Plan in the current report dated 11.05.2012.

## 61.2. Events after the reporting period

As it has been disclosed in the note 4 Accounting estimates, the Management Board of Bank Zachodni WBK S.A., after the merger of Bank Zachodni WBK S.A. and Kredyt Bank S.A. has performed a review of judgements in relation to the value of impairment allowance for loan exposures and has made significant changes to those judgements.

Apart from the events described in Notes 4 and 61.1, no other significant events which should be disclosed in the financial statements had place from the balance sheet date to the date of the approval of these consolidated financial statements.

## 62. Employment structure

<i>FTEs</i>	<b>31.12.2012</b>	<b>31.12.2011</b>
Bank	4 532	4 875

Companies	84	88
<b>Total</b>	<b>4 616</b>	<b>4 963</b>

## 63. Employee benefits

### 63.1. Employee Stock Ownership Plan

In 2012 and 2011, no employee stock ownership plan was implemented in the Group.

### 63.2. Retirement benefits and other benefits after retirement

The Group's companies paid retirement severance pays to employees who become retired in the amount set out in the Labor Code. As at the balance sheet date, a provision was established on the basis of an actuary's estimate.

<i>in PLN '000'</i>	<b>01.01.2012</b>	<b>01.01.2011</b>

**64. Social assets and the Company Social Benefit Fund**

The companies of the Group which meet the requirements of the CSBF Act, established the CSBF and created periodical charges for this purpose. The Funds had no property, plant and equipment. The objective of the Funds was to subsidize the Company's employee-related operations, loans granted to employees and other employee-related expenses.

The Group's companies set off the Funds' assets against their liabilities to them, as these assets are not separate assets under IAS/IFRS.

The table below presents the analysis of the assets, liabilities and expenses of CSBF.

<i>in PLN '000'</i>	<b>31.12.2012</b>	<b>31.12.2011</b>
Employee cash loans	7 396	8 371
Cash on CSBF's bank accounts	7 864	7 440
Fund-related payables	15 260	15 811
Charges to the Fund in the period	6 085	6 017

**65. Seasonality or cyclical nature of operations**

The operations of the Group's companies were not of seasonal nature.

**66. Non-typical factors and events**

In 2012 and 2011, no untypical events occurred in the Group (not related to operating activities) that would affect the structure of balance sheet items and the financial result to a large extent, and which were not presented in these consolidated financial statements.

**67. Custodian services**

An offer of the Bank's custodian services entailed maintaining securities accounts and registers for domestic and foreign, both institutional and individual, customers. For the special group of customers, i.e. investment funds, the Bank also played a role of a custodian bank and an issue sponsor.

The Bank held an authorization of the Polish Securities and Exchange Commission to maintain securities accounts; it was also a direct participant in the National Depository for Securities (KDPW) as

a Custodian Bank and a participant in the Securities Register (RPW) managed by the National Bank of Poland (NBP). On this basis, the Bank maintained accounts for securities admitted to public trading, deposited in KDPW or RPW. The Custody Office, the Securities Clearing Department in the Bank's Head Office was the Bank's unit responsible for maintaining securities accounts and the provision of the services of the issue sponsor.

The Custody Office provided the services of a payer's bank which involved making all financial clearings with the National Depository for Securities on behalf of serviced entities.

As regards the function of the custodian bank for investment funds, the Bank offered the following services:

- maintaining funds' assets registers;
- ensuring the correct calculation of net asset value and net asset value per share/participation unit;
- ensuring the correct settlement of agreements concerning funds' assets;
- controlling funds' investment activities.

The role of an issue sponsor is related to securities admitted to organized trading, including investment certificates of investment funds. It involves keeping records of securities owned by investors, but not deposited in securities accounts. The main tasks of an issue sponsor as regards investment certificates are as follows:

- issuing acknowledgments of the acquisition of certificates, and certificates of the ownership of shares deposited in securities account;
- maintaining and updating registers of funds' shareholders;
- verifying acknowledgments of the acquisition of certificates;
- making payments due to the redemption of certificates on redemption dates to the accounts of the persons listed in the issue sponsor's register;
- making payments of amounts due to shareholders as a result of the liquidation of a fund in the case of persons holding certificates listed the issue sponsor's register.

In 2012, income related to the maintenance of securities accounts and registers as well as the services of the issue sponsor and of the custodian bank amounted to PLN 4,960 thousand as compared to PLN 6,454 thousand in 2011, and is accounted for in the commission income.

## **68. Discontinued operations**

The Group did not carry out operations which were discontinued in 2012 or in 2011.

## **69. Information on proceedings before a court, an authority competent for arbitration proceedings or a public administration authority**

In 2012, the companies of the Group were not a party to any proceedings before a court, an authority competent for arbitration proceedings or a public administration authority, where the amount(s) claimed would amount to at least 10% of the Bank's equity.

Below, we present those pending proceedings, in which the amounts claimed are the highest and in which a company of the Group is the defendant.

- Two court proceedings regarding a credit granted to Laboratorium Frakcjonowania Osocza Sp. z o.o. in Mielec ('LFO'). The Bank is the leader of the syndicate of five banks, which, under the agreement of 04.03.1997, granted a syndicated loan to LFO. The loan was secured by, among

others, a registered pledge on the company's property, plant and equipment and the surety of the State Treasury up to 60% of the drawn amount of the loan and accrued interest. As the investment project for which the loan was extended had not been completed and the dates of the payment of commitments had not been met, the Bank, representing the syndicate, terminated the agreement under its terms and conditions and called LFO to pay claims.

- The State Treasury requested for determination whether the syndicated loan agreement concluded between LFO and the syndicate of five banks had expired on 28.02.1998 as a result of the occurrence of a contractual condition, and, as a result, the commitment of the State Treasury as the guarantor of the loan under the guarantor's agreement had expired as well. The State Treasury is represented by the General Public Prosecutor's Office of the State Treasury. Experts' opinions and auxiliary opinions were prepared and additional witnesses were questioned. In the first quarter of 2007, the State Treasury changed the lawsuit and claimed PLN 8,207 thousand including interest. Pleadings were exchanged. In the fourth quarter of 2008, the court requested the Bank to submit documents concerning the debt collection process carried out against the State Treasury on the basis of a banking executory title with the enforceability clause. The Bank delivered the required documents to the court. In September 2010, the court ordered the Bank to hand over the documents confirming the launch of the loan (the launches dates and amounts) to an accounting expert. In June 2011, the court obliged the parties to submit pleadings containing all the statements and evidence material for the proceedings. In the second quarter of 2012, the parties submitted comments to the expert's auxiliary opinion. In the third quarter of 2012, the parties requested that the auxiliary opinion be prepared by a different expert. The court issued the decision in which they admitted the expert's opinion, ordered the preparation of the opinion and set the deadline for it. The new opinion will take into consideration the comments made by the parties to the previous opinion. The date of the hearing has not been set.
- On 17.01.2001, the President of the Office for Competition and Customer Protection, upon the request of the Polish Organization of Commerce and Distribution ('POHiD'), initiated proceedings concerning competition-restricting practices on the payment cards market by VISA and MasterCard as well as 20 banks, including Kredyt Bank S.A.

On 29.12.2006, the President of the Office for Competition and Customer Protection issued the decision in which:

- they imposed a fine on Kredyt Bank of PLN 12,158.4 thousand;
- HSBC Bank Polska S.A. ('HSBC') was fined with PLN 193.0 thousand and the proceedings against this company were discontinued (under a binding agreement between HSBC and Kredyt Bank S.A., the fine for HSBC should be paid by Kredyt Bank S.A. as well).

The decision was to be enforced immediately as regards the order to discontinue the practice of joint determination of the interchange fee rate. On 17.01.2006 and 19.01.2007, appeals against Decision No. DAR 15/2006 of the President of the Office for Competition and Customer Protection were made on behalf of HSBC Bank Polska and Kredyt Bank. In this decision, the President of the Office for Competition and Customer Protection resolved that joint determination by the Banks, Visa and MasterCard of the interchange fee restricted competition. On 18.01.2007, the President of the Office for Competition and Customer Protection issued a decision in which they obliged the banks to jointly and severally pay PLN 157.6 thousand to POHiD as reimbursement of the proceedings costs. Kredyt Bank S.A. complained against this decision on 31.01.2007 and deemed it unjustified. The case was referred to the Economic Court in Warsaw which split the case into separate proceedings against each of the banks involved in the case. On 25.08.2008, the court decided to withhold the execution of the decision issued in the case of interchange fees. On 12.11.2008, the circuit court in Warsaw, the Competition and Customer Protection Court, issued a judgment amending the contested decision, in which the court stated that the Banks had not applied monopolistic practices in this respect. On 03.02.2009, the Bank received the appeal against the judgment made by the President of the Office for Competition and Customer Protection. At the hearing held on 22.04.2010, the court issued a judgment by which it overruled the judgment of the circuit court advantageous for the Bank and referred the case to the circuit court to be re-examined. In the first half of 2012, two hearings took place at which no judgment was issued. On 08.05.2012, the court decided to suspend the proceedings upon the request of

one of the participants in legal proceedings. By the date of the publication of these financial statements, the proceedings have still been suspended.

- The plaintiff – a meat processing company – filed a lawsuit against Kredyt Bank S.A. questioning the validity of concluded option transactions amounting to PLN 9,468,362, particularly the put options concluded by the Bank. The plaintiff claims and accuses the Bank of, inter alia, misleading the customer, abusing its stronger contractual position, and violating the norms of social coexistence. The Bank's attorneys responded to the lawsuit. No decisions were made at the hearings held in 2011 and 2012. The date of the next hearing was scheduled for June 2013.
- The plaintiff, i.e. partners in a general partnership, filed a lawsuit against the Bank for a compensation amounting to PLN 3 million. The plaintiff claims that the Bank violated its statutory obligation to keep a banking secret by disclosing, to a partner leaving the partnership, information concerning the bank account maintained for the partnership. The Bank's attorney responded to the lawsuit. No decisions were made at the hearings held at 13.02.2013. The date of the next hearing was scheduled for 14.04.2013.

Due to the loss of control of Reliz Sp. z o.o. and the deconsolidation of this company, the Group is not a party to any disputes concerning this company.

The Management Boards of the Group's companies are of the opinion that any risks related to the proceedings before courts or public administration authorities are properly secured by the provisions established by the Bank.

## **70. Risk management at Kredyt Bank S.A. Capital Group**

The information disclosed in this Note has been valid by the date of the merger with Bank Zachodni WBK S.A. Details are presented in Note 1.

The Bank's supervisory bodies, explicitly the Management Board and the Supervisory Board, played the most important role in the risk management process.

The Bank's Supervisory Board, through the Audit, Risk and Compliance Committees, was informed about the most vital decisions and gave opinions about the actions of the Management Board in this respect.

In 2012, the Risk and Capital Committee, directed by the member of the Bank's Management Board responsible for risk and capital management, directly managed, controlled and monitored risk.

All types of risk in the Bank were measured and monitored by the departments in the Risk and Capital Management Function, which was supervised by the Member of the Management Board accountable for the risk and capital management, i.e.:

- Financial Risks, Capital and Shared Functions Department;
- Corporate and SME Loans Risk Department;
- Retail Loans Risk Department;
- Operational Risk Department.

These units monitored and reported all risk-related aspects, at the same time being fully independent of the Bank's business units.

In the process of the risk identification, measurement and management, the Bank applied techniques relevant to a given type of risk.

The overriding objectives of the risk management policy concerning mainly the observance of internal and external limits and optimizing and mitigating risk through the process of ongoing monitoring were being systematically implemented. The risk management process was strictly related to the capital management process. The main objective of capital management in the Bank was to optimize it and,

at the same time, to meet external capital requirements. To achieve this goal, in 2008, the Bank implemented ICAAP (Internal Capital Adequacy Assessment Process).

## 71. Credit risk

Credit risk in Kredyt Bank S.A. was defined as the potential shortfall relative to the value expected for a financial instrument consequent on non-payment or non-performance by a borrower, guarantor or counter-guarantor, counterparty (in relation to treasury transactions) or an issuer (of a debt instrument), due to that party's insolvency or lack of willingness to pay, or to events or measures taken by the political or monetary authorities of a particular country.

The credit risk management process in the Bank entailed the following phases:

- risk identification;
- risk measurement (e.g. maximum approach, risk weighted assets, Exposure At Default – EAD, Expected Loss – EL, Unexpected Loss – UL);
- risk monitoring, particularly as regards the compliance of the risk profile with the determined risk appetite and established limits (e.g. exposures concentrations related to loans used to finance commercial properties, related to residential properties, industrial properties, professional properties and commercial properties);
- reporting;
- analyses and formulation of recommendations;
- a decision-making process.

The main participants in the credit risk management process, within the organization of the risk management system, were as follows:

- Supervisory Board;
- Audit, Risk and Compliance Committees;
- Bank's Management Board;
- Risk and Capital Committee;
- Retail Loans Risk Department;
- Corporate and SME Loans Risk Department;
- Business lines managers;
- Audit and Inspection Department.

Credit risk was managed taking into account the credit risk aspect corresponding to individual transactions and from the portfolio perspective.

The process of risk management for individual transactions entailed risk assessment for such a transaction and, depending on its level, application of an appropriate decision-making process. The Corporate and SME Loans Risk Department and the Retail Loans Risk Department played the key role in the process of risk management for individual transactions.

The portfolio risk management was the main responsibility of the Corporate and SME Loans Risk Department, Retail Loans Risk Department, as well as of the Risk and Capital Committee. The main tasks of the Risk and Capital Committee were as follows:

- supporting the Management Board in the following areas:
  - developing and reviewing the risk and capital management system, including the structures, processes, empowerments and policies;

- informing about the risk management system;
- monitoring the implementation status of the risk management system;
- establishing tolerance to risk – risk appetite;
- establishing the structure of internal risk limits consistent with the risk appetite;
- monitoring the implementation status of measures taken in response to observed risk;
- taking measures in response to observed risk, including cyclical reviews of the structure, processes, empowerments and policies in the area of risk and capital management, internal risk limits and corrective measures (e.g. changes in the risk parameters for the Bank's products) related to the risk and capital management below the materiality threshold;
- monitoring the risk and capital profile (including the use of limits, stress-testing, the use of the regulatory capital and of the economic capital) on the basis of the overall risk report;
- deciding on the issues of the rating and modeling system;
- reporting risk management issues to the Bank's Management Board; also informing the Bank's Management Board about decisions aimed at making the defined risk and yield ratios reach pre-determined levels;
- taking decisions concerning credit risk related to the powers granted by the Management Board.

<b>Total assets and off-balance sheet items</b>	<b>44 406 868</b>	<b>46 763 304</b>

\* comprises amounts due from private persons, individual entrepreneurs, individual farmers, and non-commercial institutions providing services to households

\*\* comprises mainly investment loans and working capital loans

\*\*\* comprises mortgage loans other than for housing purposes and refinancing loans secured with mortgages

Having regard for the existing macroeconomic situation, which is characterized by a high level of uncertainty as regards the future evolution and a relatively low rate of its improvement, the Bank focused on the monitoring of credit risk with the use of cyclical and provisional reports and analyses in order to response fast to disadvantageous trends in the quality of the loans portfolio. The Group

established early warning signs within portfolio limits, the principles for their monitoring and procedure in the case they are exceeded. On the basis of the findings of the analyses, the Bank introduced changes in the credit policy aimed at improving the quality of the loans portfolio.

The main areas of changes in terms of credit policy include:

a) for the portfolio of retail customers:

- changing the methodology of establishing impairment losses;
- changing the methodology of calculating household maintenance costs;
- introducing changes for the refinancing mortgage loan in the standard offer;
- limiting the maximum LtV for a portion of new production;
- introducing a new policy concerning the principles of appraising real estates;
- amending the principles of the credit policy for new customers applying for a cash loan;
- expanding the methodology of the behavioral assessment of customers;
- introducing new principles concerning the monitoring of payments to an account in the case of overdraft facilities;
- expanding the stress-testing methodology and its use in the process of establishing concentration limits;

b) for the portfolio of corporate and SME customers:

- introducing more restrictive principles of financing and monitoring agreements for customers from the building industry, i.e. engaged in the completion of building works under contracts and sub-contracts; and
- introducing more restrictive principles of financing non-impaired corporate and SME customers, but characterized, in the Bank's opinion, by a higher lending risk (relatively worse PD ratings);

introducing for such customers, depending on the probability of default (PD rating):

- minimum requirements concerning the coverage of transactions with collateral;
- a ban on an increase in exposure to customers.

### Currency derivatives

in PLN '000'	31.12.2012		31.12.2011*	
	Assets	Liabilities	Assets	Liabilities

\* the figures as at 31.12.2011 do not take account of the data concerning embedded instruments

As at 31.12.2012, the Bank hedged concluded currency contracts by frozen cash in bank accounts in the total amount of PLN 4.5 million. The valuation of derivatives also entails credit risk. In 2012, write-downs for active derivatives of PLN 0.6 million (presented in net trading income) were created, and write-downs for mature derivatives of PLN 4 million (presented in impairment losses) were reversed, in the Bank's income statement.

As at 31.12.2011, the Bank hedged concluded currency contracts by frozen cash in bank accounts in the total amount of PLN 5 million. The valuation of derivatives also entails credit risk. In 2011, write-downs for active derivatives of PLN 3 million (presented in net trading income) were created, and write-downs for mature derivatives of PLN 10 million (presented in impairment losses) were reversed, in the Bank's income statement.

## 72. Operational risk

The Group defined the operational risk as a possibility of an unexpected influence upon the financial result, as a consequence of maladjustment or unreliability of internal processes, people, technical systems as well as a consequence of external incidents.

To calculate the capital requirement for operational risk in pillar I, the Group applied the Standardized Approach.

As a result, the Bank, inter alia,:

- had specified roles and responsibilities of employees within the operational risk management system;
- kept a record of operational events and losses resulting from the operational risk;
- had the operational risk management system which was regularly reviewed by independent auditors.

Pursuant to the requirements concerning the application of the Standardized Approach, the Bank strengthened the operational risk assessment system. Risk and control self-assessment (CRSA) was carried out systematically in particular business areas, action plans to reduce the risk were implemented and the level of risks was measured with the application of key risk indicators (KRI).

Once a year, for the purpose of operational risk, the Group identified key operational risks (Risk Scan).

Business units played a significant role in the implementation of operational risk management tools and techniques, as the direct responsibility for the operational risk management was on the managers of particular business lines.

The infrastructure of the management and methodology were coherent within the Bank and its subsidiaries. Operational risk identification and rating tools were identical. The whole process was supervised by the Risk and Capital Committee and the Bank's Management Board.

## 73. Market risk and ALM

Market risk is defined as a degree of the hazard to the Bank's financial standing resulting from adverse changes in market parameters (interest rates, exchange rates and prices of shares) and their market volatility.

The Bank did not trade on the stock market (investments in shares are long-term investments or strategic investments in subsidiaries). Also, the Bank did not trade on commodity markets. In the Bank, among all types of market risks, we dealt with interest rate risk, including basis risk, and currency risk.

The Bank's activity was divided into two parts: Trading Book and Banking Book. Due to different nature of opened positions, the risk was monitored in each book separately.

### 73.1. Trading Book

The Trading Book was a separated part of the Bank's portfolio, where the Bank intended to generate income resulting from short-term changes in prices, interest rates, exchange rates or other market parameters. The main activity of the Trading Book was associated with financial instruments in PLN, and, to a lesser extent, also in USD and EUR.

Value at Risk (VaR) was the basic metric of risk in the trading portfolio. Value at Risk means such a value that the probability of the Bank's loss exceeding this value amounts to 1% (with assumed 99% level of significance). VaR in the Bank was calculated by historical method in the time horizon of 10

days, taking into account market figures for the previous 500 days. VaR limit for the Trading Book overlapped Global VaR, which included both the currency risk and the interest rate risk. In the process of market risk management, the Bank took account of the limitations resulting from the Value at Risk methodology, including:

- The fact that the level of risk reflected by VaR is the resultant of historical changes in price parameters and in the position on a given day. In order to present the level of the risk to which the Bank was exposed in 2012 more fully, the tables below present both VaR on the last day of the year, and the average, minimum and maximum levels in the whole 2012.
- VaR does not provide information about the distribution of potential losses when the losses exceed VaR. Although, according to expectations, the losses will not exceed the calculated VaR at the pre-determined significance level (99%), in the remaining cases the losses may be much higher than the calculated VaR. To control the above-mentioned limitations, the Bank verifies the correctness of the adopted methodology by carrying out annual backtesting of the results from the VaR model.
- In the VaR model applied by the Bank, on the basis of historic price changes, it is assumed that the prices in the future will be subject to the same distribution as the prices in the examined period in the past.

**Value at Risk (for the whole Trading Book, entails both interest rate risk and currency risk) – in EUR ‘000’**

Limit	31.12.2012	Data for 2012		
		Average	Minimum	Maximum
VaR 3 000.0	490.28	664.31	251.01	2 356.90

**Value at Risk (for the whole Trading Book, entails both interest rate risk and currency risk) – in EUR ‘000’**

Limit	31.12.2011	Data for 2011		
		Average	Minimum	Maximum
VaR 3 000.0	1 580.54	1 497.31	298.82	2 894.13

### 73.1.1. Interest rate risk

Interest rate risk reflects a degree of a hazard to the Bank's financial standing arising from adverse changes in market interest rates.

The level of interest rate risk and basis risk was monitored and limited (by establishment of limits) against BPV (*basis point value* – price sensitivity to parallel shifts in interest rates on the yield curve).

All above-mentioned limits concern the total Trading Book. The Trading Book Unit in the Cash Processing Department managing the Trading Book was divided into two sections (with the primary term of instruments/transactions made on the interbank market as the basic division criterion): Short Term Desk and Long Term Desk. The activities of the Trading Book Unit in the area of interest rate risk were limited by an internal limit on VaR for the interest rate position and stop-loss limits (the maximum acceptable value of the loss). Interest rate risk VaR was calculated using the same parameters as for Global VaR, i.e. the significance level of 99%, 10-day time horizon and 500-day observation horizon.

In 2012, the Bank did not record any exceeded VaR limits, both global and internal interest rate VaR limit in the trading portfolio.

**Value at Risk for interest rate positions**

<i>in EUR '000'</i>	Limit	31.12.2012	Data for 2012		
			Average	Minimum	Maximum
Trading	2 600.0	448.96	684.49	259.38	2 428.11

**Value at Risk for interest rate positions**

<i>in EUR '000'</i>	Limit	31.12.2011	Data for 2011		
			Average	Minimum	Maximum
Trading	2 600.0	1 590.03	1 487.39	295.19	2 883.27

The interest rate risk analysis was supplemented by stress-testing which is the amount of possible loss due to extremely adverse (critical) changes in interest rates.

Interest rate options

The Bank offered interest rate options. The Bank did not maintain an options portfolio for its own account, i.e. it did not pursue speculative activities. Options on the inter-bank market were the options hedging the position resulting from transactions with customers. Therefore, the market risk in the portfolio of interest rate option transactions did not exist.

**73.1.2. Currency risk**

Position in currencies

Exchange rate risk is a degree of the risk for the Bank's financial standing resulting from adverse changes in exchange rates on the market. This risk covers income on currency exchange operations and measurement of open position in currencies resulting from the difference between the value of assets and liabilities in a given currency. The Bank's position in currencies was managed for the Trading Book and the Banking Book jointly. The Bank's position in currencies was managed in the Trading Book.

The daily analysis of the sensitivity of the total Trading Book position to currency risk was performed through the calculation of currency risk VaR (with the same parameters as for Global VaR, i.e. the significance level of 99%, 10-day time horizon and 500-day observation horizon). Currency risk VaR values are as follows:

**Value at Risk for the Trading Book – currency risk**

<i>in EUR '000'</i>	<b>31.12.2012</b>	<b>Data for 2012</b>		
		Average	Minimum	Maximum
Trading	85.94	95.95	5.76	411.04

**Value at Risk for the Trading Book – currency risk**

<i>in EUR '000'</i>	<b>31.12.2011</b>	<b>Data for 2011</b>		
		Average	Minimum	Maximum
Trading	38.00	104.36	12.50	798.16

In the event of the currency risk, the 'value at risk' method was supplemented daily by stress-testing which is the amount of possible loss due to extremely adverse (critical) changes in exchange rates.

Currency options

The Bank offered currency options. The Bank did not maintain an options portfolio for its own account, i.e. it did not pursue speculative activities. Options on the inter-bank market were the options hedging the position resulting from transactions with customers. Therefore, the market risk in the portfolio of FX option transactions did not exist.

Below, we present the breakdown of balance sheet and off-balance sheet items by main currencies.

**Consolidated balance sheet by currencies as at 31.12.2012\***

<i>in PLN '000'</i>	CHF	EUR	GBP	USD	PLN	Other currencies	Total

**73.1.3. Capital market risk**

The Bank did not operate on the stock market within the Trading Book. In 2012, the Bank withdrew from its offer structured products in which the payment depended on the behavior of WIG 20 index; however, it still offered structured deposits in which the payment depended on the behavior of interest rate indices and exchange rates.

**73.1.4. Commodity price risk**

The Bank was not active on the commodity market within the Trading Book. At the same time, in 2012, the Bank offered commodity derivatives to corporate customers, in which the payment depended on the behavior of commodity prices. As in the case of currency options and interest rate options, the Bank did not have an open position in commodity instruments. Commodity derivatives on the inter-bank market were instruments hedging the position resulting from transactions with customers. Therefore, the commodity price risk did not exist.

**73.1.5. Capital requirements**

The capital requirements for the Trading Book as of 31.12.2012 and 31.12.2011 are as follows:

<b>Capital requirements for the Trading Book</b>		
<i>in PLN '000'</i>	<b>31.12.2012</b>	<b>31.12.2011</b>
Equity securities price risk	0	0
Specific risk of debt instruments	20	11
General interest rate risk	30 548	31 057
Settlement risk and counterparty risk	37 587	46 940
Currency risk (total for the Trading Book and the Banking Book)	0	0
<b>Total capital requirement in the Trading Book</b>	<b>68 155</b>	<b>78 008</b>

**73.2. Banking Book**

The Banking Book covers operations not covered by the trading portfolio, i.e. commercial activities of branches, credit intermediaries and the portfolios of securities hedging the liquidity and constant interest income.

**73.2.1. Interest rate risk**

The Bank actively managed the interest rate risk in the main currencies of the balance sheet, including PLN, EUR, USD and CHF.

An interest rate gap prepared separately for each currency is the basic measurement and risk-limiting tool in the banking portfolio. The following risk metrics are calculated on that basis:

- sensitivity of the measurement of assets and liabilities (BPV);
- duration;
- cumulative gap ratios.

An analysis of the interest rate gap applied in the interest rate risk management of the Banking Book was based on information on particular items of the Bank's balance sheet as well as off-balance items sensitive to changes in interest rates. In the case of financial instruments without defined maturity dates (according to stability analyses for each type of a product), the Bank implemented the model of periodic deposits rollover, which replicates the behavior of particular products. This approach allows for more effective management of risk associated with this type of instruments and for the generation of constant income from investments of these assets.

Stress-testing and VaR calculations were additional interest rate risk monitoring tools in the Banking Book.

#### Interest rate risk analysis

The interest rate risk analysis was conducted upon the following assumptions:

- a stable part of current accounts in PLN and EUR was cyclically invested for the period of:
  1. 8 years for PLN;
  2. 5 years for EUR;
- a stable portion of savings accounts in PLN was invested cyclically (every month) for the periods of 2 to 5 years; in the second half of 2012, to adapt the model interest rate risk profile to the product features through greater correlation between the interest rate on the savings account and the interest rate on short-term term deposits, average duration of assets in the benchmark portfolio of savings accounts was shortened through, among other things, the sales of Treasury bonds from the available-for-sale portfolio with the maturity from 2 to 5 years;
- unstable parts of current accounts in PLN and EUR, and current accounts in other currencies were classified in the shortest time horizon;
- an unstable part of savings accounts in PLN was invested cyclically in terms from 1 to 3 months (every month) and O/N; savings accounts in other currencies were classified in the shortest time horizon;
- free capital approved for the whole year was invested cyclically for the period of 10 years (with 1/120<sup>th</sup> of the free capital invested monthly); an excess or shortage compared to the present amount of free capital was classified in the shortest time horizon; and the passive portion of the free capital portfolio was deemed as insensitive to changes in interest rates;
- loans were recognized in net terms;
- fixed interest rate loans were accounted for according to the payment schedule, and the floating interest rate loans were presented in the closest revaluation period;
- a gap report, apart from flows related to the principal amount, also presented known future interest flows;
- each flow was divided proportionally into two parts which were classified in adjoining nodes of the curve;
- a cumulative gap was calculated from the longest to the shortest term period.

The interest rate gaps diagrams for the position resulting from the operation of branches (including derivatives used as hedging instruments) based on an internal system of transfer rates in particular currencies: PLN, EUR, USD and CHF, are presented below.

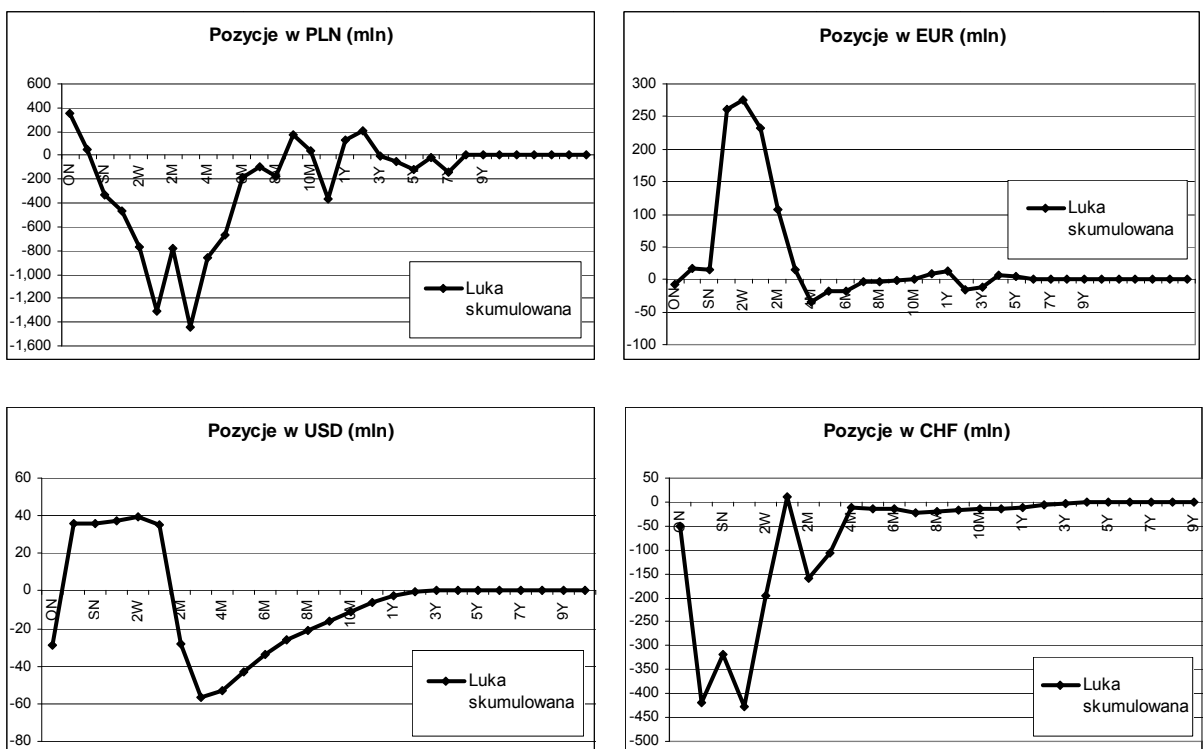

The diagrams present the mismatch between the repricing periods for assets and liabilities in time ranges: from O/N time range (overnight) to 10Y time range (10 years). The cumulative gap presents the total mismatch for a given time horizon; the gaps are accumulated beginning from the most remote date. The most noticeable mismatch both in particular time ranges and accumulated ranges appear in time ranges up to 3 months. It is related to the structure of the Bank's balance sheet, namely customers' floating interest rate loans portfolio with repricing periods of 1 month and 3 months and financing, i.e. customers' deposits and long-term floating interest rate loans are the main position affecting the interest rate gap.

The Bank actively mitigated the risk resulting from the mismatch between balance sheet assets and liabilities, closing the positions with derivatives and applying hedge accounting.

Data for the Bank as at 31.12.2012 (in original currencies)

Data for the Bank as at 31.12.2011 (in original currencies)

The Bank analyzed BPV of the Bank, with the simultaneous upward shift of interest rates by 10 b.p. in breakdown into particular currencies.

The total BPV for the Banking Book is presented below. It was calculated as the aggregate BPV for particular currencies and portfolios. According to the methodology of calculating BPV for limits, the liabilities side of the Free Capital portfolio, as insensitive to changes in interest rates, was not included in calculations.

<i>in EUR '000'</i>	<b>31.12.2012</b>	<b>31.12.2011</b>
BPV (calculation to limit)	-2 149	-1 957

In addition, the Bank carried out stress-testing for the sensitivity of the economic value of the Banking Book position to changes in interest rates. The results of stress-testing are shown in the table below:

<b>Change in NPV for the Banking Book position for pre-determined scenarios</b>		
<i>in EUR million</i>	<b>31.12.2012</b>	<b>31.12.2011</b>
Parallel upward shift of the curve by 200 b.p.	-43.6	-36.5
Parallel downward shift of the curve by 200 b.p.	50.4	42.6

### **73.2.2. Hedge accounting**

#### **Fair value hedging accounting**

In 2012 and 2011, the Bank did not apply hedge accounting for fair value hedge.

#### **Hedge accounting of cash flows**

In 2012, as in 2011, the Bank continued to apply hedge accounting for the part of the mortgage loans portfolio based on 3-month WIBOR rate, which involved the conclusion of IRS's in which the Bank received fixed and paid floating interest rates. Interest rate risk resulting from a change in the 3-month interest rate was the hedged risk in this case.

In 2012, the Bank started to apply hedge accounting prior to changes in cash flows for mortgage loans granted in CHF resulting from changes in market interest rates (CHF LIBOR) and exchange rates (CHF/PLN), and for deposits made in PLN along with their rollover resulting from changes in market interest rates (WIBOR). Cross Currency Interest Rate Swap (CCIRS) was the instrument hedging both relations.

### **73.2.3. Currency risk**

As mentioned above, the position in currencies was managed in the Trading Book. The positions related to the Bank's customers' transactions arising during the day were transferred, via internal transactions, to the Trading Book.

It should be noted here that the currency risk at Kredyt Bank was perceived not only as the risk occurring for an open position in currencies, but also as the risk of a change in the value of certain products as a result of changes in exchange rates. In particular, this risk occurs in the case of loans extended in foreign currencies. In order to mitigate credit risk, increasing in the case of the growth in the exchange rate of the loan currency (this also refers to loans granted in PLN, with its value indexed to the foreign currency exchange rate), the loans agreements for institutional customers contained clauses on the establishment of additional collateral or permit to translate the loan when the customer did not generate income in the loan currency. Additionally, in order to hedge the exchange rate risk the customer is exposed to, derivatives (forwards, options) were offered to him.

In order to mitigate the currency risk on granting housing purposes mortgages in a foreign currency to individual customers, the Bank, analyzing the creditworthiness:

- a) determined the value of the highest monthly interest and principal repayment installment for the applied loan with the assumption that the principal of the applied loan is 20% higher;
- b) calculated the maximum level of LtV (*Loan To Value*) ratio on a lower level than for loans in PLN (LtV ratio should be understood as the loan value/collateral value ratio);
- c) additionally, the applicant was informed about the foreign exchange risk.

In May 2010, the Bank eliminated from its offer housing purposes mortgages denominated in CHF, focusing on the development of the offer in PLN and EUR. In January 2012, the housing purposes mortgages denominated in EUR were also withdrawn from the offer.

### **73.3. Liquidity risk**

The liquidity risk is strictly associated with activities of any bank. It results, among other things, from the mismatch of assets and liabilities in terms of maturity dates, which is a natural effect of varied customers' requirements as regards deposits and loans. Maintenance of financial liquidity, understood as the ability to timely meet financial liabilities, is the crucial element of the policy on assets and liabilities management applied by the Bank. The current liquidity is maintained through correcting the surplus or shortage of liquid cash by operations conducted on the interbank money market. The Bank's safety calls for the maintenance of liquid reserves and of the proper term and quality structure of the whole balance sheet. Decisions related to liquidity risk management were made by the Risk and Capital Committee. The Market Risk Office measured and monitored strategic (long-term) liquidity.

The Bank hedged the liquidity risk by:

- maintenance of an appropriate level of cash, taking into account volume of statutory provisions;
- possession of a proper volume of portfolios of liquid securities (governmental bonds);
- performance of transactions on derivatives;
- maintenance of a diversified portfolio of deposits as regards terms and customers;
- diversification of the sources of long-term financing;
- access to the interbank market and open market transactions;
- access to the lombard loan.

An analysis of the Bank's liquidity was performed mainly on the basis of the assessment of the deposit base stability and the liquidity gap report through, among other things, monitoring the mismatch of the maturity dates of assets and liabilities, which makes it possible to forecast the demand for liquid assets and avoid excessive concentration of cash disbursements on a close date. In addition, the Bank regularly carried out stress-testing for the liquidity and monitored the level of liquidity buffers in stress conditions.

According to the methodology of the Financial Services Authority adopted by the Bank, the stable part of current accounts and savings accounts was recognized in the shortest term range. In the range up to 6 months, the Bank presented highly probable cash flows (the principal amount and interest). In ranges above 6 months, the Bank presented only cash flows related to principal amounts. The adoption of the said methodology resulted in a more restrictive picture of the Bank's liquidity than in the situation when the gap analysis shows all interest flows expected in the future.

In the tables below, the current accounts and savings accounts are presented in 'on demand' term range, term deposits are presented at maturity, which results in the negative gap in the ranges up to 1Y, particularly in the range up to 1M. In reality, the deposit base was characterized with a high level of stability, which was analyzed by the Bank on an ongoing basis. On this basis, the Bank prepared the liquidity gap, having regard for 'made real' (i.e. expected by the Bank) maturity dates for particular categories of customer deposits.

<b>Liquidity gap</b>	<b>-18 616</b>	<b>-3 169</b>	<b>-1 641</b>	<b>-1 714</b>	<b>3 130</b>	<b>4 189</b>	<b>5 127</b>	<b>13 008</b>

The liquidity gap presented above was prepared on the basis of contractual maturities for particular balance sheet items. Liabilities without a defined maturity (current accounts and savings accounts) were recognized in the shortest term range, although the actual/made real maturity for such instruments occurred in further tenors.

At the end of 2012, as compared to the end of 2011, the following changes in the structure of the Bank's financial liabilities can be noticed:

- an increase in the balance of customers' deposits by PLN 2.7 billion;
- the amount of accepted inter-bank deposits and cash loans on the wholesale market decreased by PLN 4.7 billion.

The Bank's financial liquidity was also monitored on the basis of a system of ratios reflecting the structure of liabilities and receivables for time ranges from 7 days to 10 years.

- the ratio of the coverage of the 5- and 30-day liquidity gap with liquid assets – Short Term Liquidity Surplus (STLS) – short-term liquidity ratio (to 5 and 30 working days respectively);
- the liquidity buffer in the liquidity stress-test (within a 30-day horizon);
- Liquidity Mismatch Ratio (LMR) – medium-term liquidity ratio (up to 3, 6 months);
- Coverage Ratio (CR) – liquidity ratio which informs about a degree of financing long-term assets with long-term liabilities (1, 2, 3, 5 and 10 years);
- short-term and long-term liquidity ratios according to Basel III (LCR and NSFR).

The Bank's liquidity was also monitored through a set of regulatory liquidity ratios pursuant to the requirements of Resolution No. 386/2008 of the Polish Financial Supervision Authority.

### 73.3.1. Regulatory liquidity ratios

Within the liquidity management process, the Bank was required to maintain the ratios listed in Resolution No. 386/2008 of the Polish Financial Supervision Authority above the established minimum limit.

M4	Own funds and stable external financing to non-liquid assets and limited liquidity assets: $((B1+B2)/(A5+A4))$	1.00	1.14

**73.3.2. Financing sources – amounts due to banks and subordinated liabilities**

<i>in PLN '000'</i>	<b>31.12.2012</b>	<b>31.12.2011</b>
Loans and advances from KBC Group	1 332 759	3 234 826
Term deposits, including:	2 872 054	5 160 973
- from KBC Group	2 771 506	5 117 701
Current accounts, including:	73 967	83 795
- from KBC Group	38 340	69 746
Other liabilities	4 298	6 897
<b>Total amounts due to banks</b>	<b>4 283 078</b>	<b>8 486 491</b>
Subordinated liabilities (from KBC Group)	971 533	1 036 510
<b>Total, including:</b>	<b>5 254 611</b>	<b>9 523 001</b>
- from KBC Group, including:	5 114 138	9 458 783
- liabilities in the currency other than PLN	4 686 659	8 869 558

The deposits base, with the decreasing share of the financing from the wholesale market in the liabilities structure, was the main source of financing for the loans portfolio. In 2012, the Bank reduced the scale of the financing in foreign currencies sourced directly from KBC Group and, at the same time, to hedge the structural currency gap, greatly increased the exposure to currency derivatives (of swap type).

Due to a high degree of the deposits base diversification and the reduced scale of the financing from the wholesale market, the Bank was not clearly dependent on a particular market segment, group of customers or a specific type of deposits.

The structure of customers' deposits has been presented in Note 44.
